At the University of Arizona Mel and Enid Zuckerman College of Public Health, we strive for Organizational Excellence and Opportunity.

“At the center of organizational excellence and opportunity is the recognition and acceptance of the talents, worldviews, perceptions, cultures, and skills that each individual or community brings to the education enterprise that can be harnessed to prepare students for leading, living, and making positive impacts locally, nationally, and globally. Irrespective of differences in backgrounds, experiences, or opinions, every individual, group, or community contributes positively to all dimensions of the university, and is a critical component of and contributor to organizational excellence and opportunity. Harnessing and celebrating our differences at the University of Arizona is central to our pursuit of organizational excellence and opportunity.”

– [UA Office of Diversity & Inclusion](#)

Our Mission: The Mel and Enid Zuckerman College of Public Health is dedicated to promoting the health and wellness of individuals and communities in the southwest and globally with an emphasis on achieving health equity through excellence in education, research, and service.

Our Values: The Mel & Enid Zuckerman College of Public Health acts with respect and integrity to continuously advance health and well-being for all through knowledge, collaboration, empowerment, advocacy and sustainability. Our core values are: Fairness, Trust, Access, Engagement, Excellence, Innovation, Commitment, Collegiality, Open Communication, Participation, Consensus, and Enhancement.

We strive to foster an educational community that values innovation and excellence in teaching, creation and dissemination of knowledge, practice-based research and research-based practice to address the health needs and interests of individuals and communities.

Graduate Certificate in Public Health Emergency & Epidemic Preparedness Curriculum.....	149

What is Public Health?

The broad mission of public health was defined by the Council on Education for Public Health in 1978 as “enhancing health in human populations through organized community effort.” Public health practitioners are concerned with the determinants of disease, disability and premature death, and the planning and organization of appropriate health services, including health education and policy. The aim of public health is to apply scientific, behavioral, social, and technical knowledge to prevent disease and disability, and to promote health by means of organized community effort. Programs of public health train students in these and other disciplines and help them to practice the coordination of the various fields in the interest of community health.

The Bachelor of Science in Public Health and the Bachelor of Arts in Wellness and Health Promotion Practice are designed to prepare students to improve the quality of life of individuals and communities with a focus on wellness and prevention of disease. The Master and Doctor of Public Health are professional degrees designed to prepare graduates to solve public health problems as practitioners who can apply a breadth of knowledge as well as expertise and experience in one specific area of public health. Academic programs include Master of Science and Doctor of Philosophy degrees that advance the field of public health with research in various disciplines. The academic programs in MEZCOPH focus on Biostatistics, Epidemiology, Health Behaviors, Health Administration and Policy, and Environmental Health Sciences. This curriculum guide presents course requirements for the Bachelor, Master’s and Doctoral programs in the Mel and Enid Zuckerman College of Public Health (MEZCOPH).

Current students should use this curriculum guide in conjunction with the academic advisors and faculty mentors to design their personal plans of studies. Students interested in attending MEZCOPH will be able to gain knowledge about what their academic experience will include while being a student at MEZCOPH. Completion of each of these programs allows students to take positive steps forward toward increasing their knowledge about public health and to acquire the skills needed to solve public health problems in one or more specific area of public health.

Bachelor of Science with a Major in Public Health

The Bachelor of Science with a major in Public Health is a College-wide degree and, as such, undergraduate teaching faculty come from all MEZCOPH departments.

The Bachelor of Science with a major in Public Health is designed to promote an understanding of health and disease based on public health principles. The primary goal of the program is to prepare students to work in public health to improve the quality of life of individuals and communities. The curriculum provides general knowledge regarding public health principles and practice augmented by concentrated study (emphasis) in Environmental and Occupational Health, Global Health, Health Promotion, Health Systems Theory and Practice, One Health, Public Health Practice, and Quantitative Methods in Public Health. Field work provides students with an experience that incorporates classroom learning into public health practice and prepares them for future employment. This program is available in-person on the Tucson campus or in a fully-online format. The Bachelor of Science (BS) with a major in Public Health addresses general curriculum and foundational domains, competencies, cumulative and experiential activities, and cross-cutting concepts which can be found on the [program website](#).

The core competencies of the major provide the knowledge and skills needed to conduct public health practice in diverse populations.

Particular emphasis is placed on understanding health care delivery in the US and abroad, incorporating epidemiologic and statistical methodologies into public health practice, providing culturally appropriate and effective interventions, identifying health disparities, planning and evaluating health interventions, and understanding the link between nutrition and health.

All students enter the program as declared Public Health majors. In order for the student to achieve advanced standing and be eligible to take 400-level courses, they will have to meet the following criteria:

- University of Arizona GPA of 2.0 or higher;
- Completion of public health prerequisite courses with a C or higher; and
- Completion of the advanced standing application.

BS – Major in Public Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED CORE COURSES - (36 units; grade of C or higher required)

ENGL 307	Business Writing (3) OR ENGL 308 Technical Writing (3) OR HPS 307 Public Health Narratives (3)
EPID 309	Introduction to Epidemiology (3)
PHPM 310	Health Care in the US (3)
HPS 350	Principles of Health Education and Health Promotion (3)
EHS 375	Introduction to Environmental & Occupational Health (3)
BIOS 376	Introduction to Biostatistics (3)
HPS 387	Health Disparities and Minority Health (3)
HPS 405	Biology in Public Health (3)
HPS 433	Global Health (3)
HPS 478	Public Health Nutrition (3)
HPS 493A	Field Work in Public Health (6)

EMPHASIS UNITS - (minimum 12 units required; Select one emphasis)

Environmental and Occupational Health Emphasis

REQUIRED:	HPS 306	Drugs and Society (3)
Select 9 units:	HPS 313	Health and Medicine in Classic Antiquity (3)
	HPS 401	Introduction to Mapping for Public Health (3)
	HPS 409	Global Water, Sanitation, and Hygiene (WaSH) (3)
	EHS 320	Disaster Management and Response (3)
	EHS 418	Introduction to Health Risk Assessment (3)
	EHS 420	Environmentally Acquired Illnesses (3)
	EHS 422	Introduction to Occupational Safety (3)
	EHS 425	A Public Health Lens to Climate Change (3)
	EHS 426	Topics in Environmental Justice (3)
	EHS 439A	Outbreaks and Environmental Microbiology: Then to Now (3)
	EHS 484	Fundamentals of Industrial and Environmental Health (3)
	EHS 489	Public Health Preparedness (3)
	PHP 308	Community Health Education for Disease Outbreaks (3)
	PHP 424	Optimizing Well-being and Resilience in Older Adults (3)

Global Health Emphasis

Select 12 units:

- HPS/GHI 302 Introduction to Program Evaluation in Global Health (3)
- HPS 306 Drugs and Society (3)
- HPS 311 Childhood Obesity (3)
- HPS 401 Introduction to Mapping for Public Health (3)
- HPS 404 Fundamentals of Evaluation (3)
- HPS/GHI 406 Immersive Experiences in Women's Health Research (3)
- HPS 409 Global Water, Sanitation, and Hygiene (WaSH) (3)
- HPS 416 The World's Food and Health (3)
- HPS 417 Health Systems in Global Health (3)
- HPS 438A Women's Health in the Global Perspective (3)
- HPS 456 A Circular Approach to Global Indigenous Research (3)
- HPS 459 Management of Global Public Health Emergencies (3)
- HPS 493C Global Experience in Public Health (3)
- HPS 497F Community and School Garden Workshop (3)
- CPH/GHI 423 Health Promotion Approach to Address Health Inequity (3)
- CPH/GHI 457 Global Maternal Health: Cultural Perceptions and Policy Approaches (3)
- CPH/GHI 470 Global Health Leadership (3)
- CPH/GHI 481 Food Systems Preparedness for Global Emergency Risks (3)
- GHI 414 Intercultural Communication for Health Sciences (3)
- GHI 432 Food in 2050 and Beyond: Climate Change and Global Health (3)
- GHI 440 Comparrative Health Analysis from a Global Perspective (3)
- CPH/GHI 423 Health Promotion Approach to Address Health Inequity (3)
- EPID 411 Health and Disease Across Time and the World (3)
- EPID 479 Infections and Epidemics (3)
- PHP 308 Community Health Education for Disease Outbreaks
- 400-level Public Health Study Abroad opportunities

Health Promotion Emphasis

Select 12 units:

- HPS 300 Public Health in the 21st Century (3)
- HPS/GHI 302 Introduction to Program Evaluation in Global Health (3)
- PHP 301 Introduction to Gerontology (3)
- PHP 308 Community Health Education for Disease Outbreaks (3)
- HPS 400 Contemporary Community Health Problems (3)
- HPS 401 Introduction to Mapping for Public Health (3)
- HPS 402 Corporate Wellness (3)
- HPS 403 Applications in Health Promotion Behavioral Theories & Health (3)

HPS 404	Fundamentals of Evaluation (3)
HPS 408	Disabilities in Public Health (3)
HPS 409	Global Water, Sanitation, and Hygiene (WaSH) (3)
HPS 412	Public Health Approaches to Mental Disorders in the US (3)
HPS 442	Nicotine Dependence, Treatment, and Coaching Interventions (3)
HPS 449	Family Violence (3)
HPS 481	Health Education Intervention Methods (3)
HPS 488	Adolescent Health (3)
HPS 497E	Public Health for Community Wellness (2)
HPS 497G	Open Airways for Schools (1)
HPS 497L	Public Health for School and Community Based Obesity Prevention (2)

Health Systems Theory and Practice Emphasis

Select 12 units:	PHP 305	Population Health in the Digital Age (3)
	PHP 322	Health Education and Ethical Leadership (3)
	PHP 419	Alzheimer's Disease, Other Dementias, and the Role of Public Health (3)
	PHP 421	Introduction to Public Health Law and Ethics (3)
	PHP 424	Optimizing Well-being and Resilience in Older Adults (3)
	HPS 402	Corporate Wellness (3)
	HPS 412	Public Health Approaches to Mental Health Disorders in US (3)
	HPS 417	Health Systems in Global Health (3)
	HPS/PHPM 425	Latino Health Disparities (3)
	HPS 444	Rethinking Race and Health in the United States (3)
	HPS 447	Case Studies in State Health Policy (3)
	HPS 487	Feminist Interpretations of Health (3)
	PHPM 407	Health Economics and Policy (3)
	PHPM 415	Strategic Planning (3)
	PHPM 448	Addiction and Substance Use Policy (3)
	PHPM 458	Health Care Marketing (3)
	PHP 437	Management and Leadership in Long-term Care (3)
	PHP 441	Medicaid Policy and Politics (3)
	PHP 447	Case Studies in State Health Policy (3)

One Health Emphasis

REQUIRED:	CPH 402	Climate and Health (3)
Select 6 units:	HPS 300	Public Health in the 21st Century (3)
	HPS 313	Health and Medicine in Classic Antiquity (3)
	HPS 497F	Community and School Garden Workshop (3)
	EHS 320	Disaster Management and Response (3)

- EPID/EHS 445 One Health Foundations (3)
- EHS 446 One Health Approach and Case Studies (3)
- HPS 409 Global Water, Sanitation, and Hygiene (WaSH) (3)
- EHS 418 Introduction to Health Risk Assessment (3)
- EHS 420 Environmentally Acquired Illness (3)
- EHS 439A Outbreaks and Environmental Microbiology (3)
- EPID 479 Infections and Epidemics (3)
- PHP 308 Community Health Education for Disease Outbreaks (3)
- PHP 436 Aging, Environment, and Well-being (3)

Public Health Practice Emphasis

Select 12 units: CPH/GHI 325 Dietary Assessment in Public Health Practice (3)

- HPS 404 Fundamentals of Evaluation (3)
- PHPM 407 Health Economics and Policy (3)
- PHPM 415 Strategic Planning (3)
- PHP 419 Alzheimer's Disease, Other Dementias and the Role of Public Health (3)
- PHP 421 Introduction to Public Health Law and Ethics (3)
- PHPM 415 Strategic Planning (3)

CPH 498H**	Honors Thesis (3)

NOTES

Emphasis courses may also be used as College of Public Health (CPH) electives.

** CPH independent study courses can be taken from any program within the College of Public Health with course prefixes of BIOS, EHS, EPID, HPS, PHPM or PHP.

Bachelor of Science with a major in Public Health Curriculum:
57 units Total Minimum Requirement: 120 units

Bachelor of Arts in Wellness and Health Promotion Practice

In alignment with the mission of the Mel and Enid Zuckerman College of Public Health, the Bachelor of Arts in Wellness and Health Promotion Practice will promote the health and wellness of communities across the southwest and globally.

The major in Wellness and Health Promotion Practice offers students the opportunity to develop the knowledge, ethics, and skills to provide professional services and interventions. As such, students learn to work with diverse populations at different ages and stages of life in order to promote a healthy lifestyle and overall wellness. For the purposes of this degree, wellness means a state of being in optimal health. Students learn to promote optimal wellness within themselves, among individuals, families and communities. Their practicum and internships are in a variety of settings such as homes, communities, governmental organizations, businesses, health care centers, hospitals, schools, faith-based organizations and other non-governmental organizations.

Students learn to conduct health needs and resource assessments, to plan health promotion services and interventions using appropriate evidence-based theories and models for behavior change, to implement and manage services and interventions, and to evaluate health promotion and wellness services and programming. Students learn skills and resources to support the care for their personal health and wellness. They become practitioners themselves prior to teaching, training and consulting others in health promotion and wellness.

In addition to course work, students complete a practicum and internship enabling the students to apply their knowledge and skills. Such experiences will enhance their competencies in service delivery, communication, advocacy for health promotion and optimal wellness as ethical professionals, leaders and managers. These skills prepare students to be work ready upon graduation.

Potential directions for students graduating with a BA in Wellness and Health Promotion Practice may be employment, certification, or graduate studies. Graduates can apply for certification as a certified health education specialist (CHES) through the National Commission for Health Education Credentialing <https://www.nchec.org/ches>. Potential graduate programs include, but are not limited to, public health, nursing, nutrition, and medicine.

BA – Major in Wellness and Health Promotion Practice Curriculum

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED SUPPORTING COURSEWORK - (6 units)

Statistics - (select 3 units)

Bachelor of Arts in Wellness and Health Promotion Practice:
54 units in major Total Minimum Requirement: 120 units

Undergraduate Minor Programs

The Mel and Enid Zuckerman College of Public Health offers eight undergraduate minors designed to enhance knowledge in a specific field and increase skills valuable to future employers. Each minor consists of 18 units, 6 of which may also be applied toward an undergraduate major. Students should consult with a Public Health advisor to determine how they can coordinate their class schedules to meet both major and minor degree requirements.

- The [Addiction and Substance Use](#) minor will provide an overview of the psychological, physiological, chemical, and social elements of substance use, and equip students to provide effective, evidence- based interventions.
- The [Aging and Population Health](#) minor is designed to prepare students to tackle the complex health challenges presented by an aging population.
- The [Climate Change and Public Health](#) minor will provide students with an understanding of the implications of climate change on population health.
- The [Environmental and Occupational Health](#) minor will prepare students to manage programs that protect communities and workers from health risks such as contaminants, hazardous living conditions, or toxic working conditions.
- The [Global Health](#) minor is designed to give students an understanding of the interconnected and international health challenges the world faces today.
- The [One Health](#) minor will guide students to understand how human health is deeply intertwined with the health of animals and the environment, including how disease spreads between animals and humans (zoonotic disease).
- The [Population Health and Data Science](#) minor will introduce students to the fundamentals of data science in the health sciences, and provide them with the skills to manage, analyze, and interpret big data.
- The [Public Health](#) minor will prepare students to work with community organizations, health and wellness programs, and government agencies and non-profits to help people and communities lead healthier, happier lives.
- The [Wellness and Health Promotion Practice](#) minor will enhance students' ability to work in a range of health related careers, from healthcare providers to community health agencies, and to implement programs that use mindfulness, nutrition, and exercise to meet the needs of diverse populations.

Undergraduate Minor in Addiction and Substance Use Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 18 units are required for the undergraduate minor in Addiction and Substance Use.

DESCRIPTION:

The Substance Use minor provides a comprehensive and interdisciplinary overview of licit and illicit substances, substance use patterns, risks of use, types of substance use treatment, and disparities in access to treatment. It follows a bio-psycho-social framework that emphasizes the intersection of environmental, social, psychological, physiological, and pharmacological factors that contribute to substance use and substance use disorder. The three required public health courses establish this conceptual foundation, and the elective courses allow students to explore the economic, social, health implications as taught from different disciplinary perspectives. These include predictors of use as well as prevention and treatment programs and policies.

NOTE: Students may apply 6 units toward a BS in Public Health or a BA in Wellness and Health Promotion Practice.

REQUIRED - (9 units)

PHPM 225	Introduction to Addiction and Substance Use (3)
HPS 306	Drugs and Society (3)
PHPM 448	Addiction and Substance Use Policy (3)

ELECTIVES - (select 9 units)

PSY 313	Drugs and the Brain (3)
HPS 302	Introduction to Program Evaluation in Global Health (3)
PHIL 345	Philosophy and Psychiatry (3)
LAS 348	Drug Wars and Oil Fortunes in Latin America (3)
FCM 410	Substance Misuse in Maternal and Child Health (MCH) Populations (2)
HUSV 430	Substance Abuse Theory and Counseling (3)
HPS 442	Nicotine Dependence, Treatment, and Coaching Interventions (3)
PHCL 445	Drugs of Abuse (3)
PHCL 452	Substance Abuse Disorder and Addiction (3)
SERP 478	Substance Use and Prevention (3)
FCM 496A	Advancements in Substance Misuse Research & Clinical Care (2)

No more than 3 units may be selected from the following:

EPID 309	Introduction to Epidemiology (3)
PHPM 310	Health Care in the U.S. (3)
PHIL 321	Medical Ethics (3)
HPS 350	Principles of Health Education and Health Promotion (3)
PAH 350	Health Humanities: Intercultural Perspectives (3)
HPS 387	Health Disparities & Minority Health (3)
HPS 404	Fundamentals of Evaluation (3)
PCOL 406	Comprehensive Human Pharmacology (3)
AFAS/HPS 444	Rethinking Race and Health in the United States (3)

Undergraduate Minor in Aging and Population Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 18 units are required for the undergraduate minor in Aging and Population Health.

DESCRIPTION:

The Aging and Population Health Curriculum is designed to prepare students to tackle the complex challenges and manage the opportunities that arise in addressing the health and wellbeing needs endemic to an aging population through a population health perspective and using a multi-disciplinary approach. Multi-disciplinarity is central to this curriculum because of the multifactorial nature of contributors (health, social, economic, etc.), to health and well-being in later life.

The minor in Aging and Population Health aims to provide students with the foundational knowledge necessary to conceptualize, understand and address the health and wellbeing needs of an aging population in a diverse and broad range of health-related and social professional settings, aging and long-term care industry, as well as prepare students for further or advanced studies. Students will take core and elective courses taught by a multi-disciplinary team of faculty with expertise in aging studies/ gerontology, healthcare, public health, psychology and sociology.

NOTE: BA in Wellness and HP Practice majors cannot also be in the Aging and Population Health minor

REQUIRED - (15 units)

PHP 210	Diversity, Health and Wellbeing in Later Life (3)
PHP 301	Introduction to Gerontology (3)
PHP 312	Health Promotion and Well-being in Later Life (3)
PHP 436	Aging, Environment and Wellbeing (3)
PHP 437	Management and Leadership in Long-term Care (3)

ELECTIVES - (select 3 units)

CHS/SOC 215	Sociology of Aging and Health (3)
HPS 405	Biology in Public Health (3)
HPS 412	Public Health Approaches to Mental Health Disorders in the US (3)
HDFS 413	Issues in Aging (3)
PHP 419	Alzheimer's Disease, Other Dementias and the Role of Public Health (3)
PHP 424	Optimizing Well-being and Resilience in Older Adults (3)
CPH 427	Healthy Aging for Women (3)
EPID 454A	Healthy Aging in Action (3)
EPID 454B	Healthy Aging in Action II (3)
PHPM 458	Health Care Marketing (3)

Undergraduate Minor in Climate Change and Public Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

*A minimum of 18 units are required for the undergraduate minor in Climate Change and Public Health.
At the declaration of this minor, a minimum cumulative GPA of 2.0 is required.*

DESCRIPTION:

Climate change is a global emergency that threatens health, social, and economic development of all peoples of the world. Climate change is the single biggest health threat facing humanity, and health professionals worldwide are already responding to the health harms caused by this unfolding crisis. As with other causes of poor health, climate change disproportionately effects the health of low-income communities and minority populations and contributes to the widening of health and socioeconomic inequities. Given heightened political and economic pressures for action on climate change, there is a growing demand for health professional trained in climate change as well as climate researchers trained in public health.

NOTE: *Students may apply 6 units toward a BS in Public Health or a BA in Wellness and Health Promotion Practice.*

REQUIRED -

Climate Basics (6 units)

Choose from the following:

EVS 263	Climate Change: Human Causes, Social Consequences and Sustainable Responses (3)
CPH 402	Climate Change and Health (3)
EHS 425	A Public Health Lens to Climate Change (3)

Climate Influences on Disease Processes (6 units)

Choose from the following:

AIS 403	Globalization and Indigenous People (3)
EPID 420	Environmentally Acquired Illnesses (3)
CPH 432	Food in 2050 and Beyond: Climate Change and Global Health (3)
EHS 439A	Outbreak & Environment Microbiology: Then and Now (3)
EPID/EHS 445	One Health Foundations (3)
BIOS/EPID 452	Health Data Analysis and Communication Methods (3)
EPID 479	Infections and Epidemics (3)
CPH 481	Food System Preparedness for the Global Emergency Risks (3)

Climate Influences on Health Systems and Health Equity (3 units)

Choose from the following:

CPH 230	Public Health, Climate Change and Resilient Food Systems (3)
BE/ENVS 234	The Future of Food (3)
GEOG 302	Introduction to Sustainable Development (3)
EHS 426	Topics in Environmental Justice (3)
CPH/GHI 427	Healthy Aging for Women (3)
CPH 432	Food in 2050 & Beyond: Climate Change and Global Health (3)
HPS 433	Global Health
EPID 454B	Healthy Aging in Action II (3)

Public Health Response to Climate Change (3 units)

Choose from the following:

EHS 220	Deadly Hype: Truth in the Age of (Mis)Information (3)
PHP 308	Community Health Education for Disease Outbreaks (3)
HPS 401	Introduction to Mapping for Public Health (3)
HPS 409	Global Water, Sanitation and Hygiene (WaSH) (3)
EHS 426	Topics in Environmental Justice (3)
HPS 433	Global Health (3)
EHS 446	One Health Approach and Case Studies (3)
HPS 459	Management of Global Public Health Emergencies (3)
EHS 489	Public Health Preparedness (3)

Undergraduate Minor in Environmental & Occupational Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 18 units are required for the undergraduate minor in Environmental & Occupational Health. At the declaration of this minor, a minimum cumulative GPA of 2.0 is required.

DESCRIPTION:

Environmental health is a multidisciplinary field focusing on understanding the effect of the environment and occupational exposure on human health. Environmental Health professionals are trained to diagnose, intervene and prevent public health threats such as air and water pollution, food safety, workers safety, waste managements and many others, as well as emerging public health threats, including new foodborne, waterborne or airborne illnesses and exposures. A minor in EOH will prepare students for job opportunities in industrial settings, with local, tribal, state, national and international health departments/agencies. Others may work with non-governmental organizations, or relief agencies to address environmental and occupational determinants of health and promote population health.

NOTE: *Students may apply 6 units toward a BA in Wellness and Health Promotion Practice.*

REQUIRED - (15 units)

EPID 309	Introduction to Epidemiology (3)
EHS 375	Introduction to Environmental and Occupational Health (3)
EHS 418	Introduction to Human Health Risk Assessment (3)
EHS 425	Public Health Lens to Climate Change (3)
	-OR- EHS 484 Fundamentals of Industrial and Environmental Health (3)
EHS 439A	Outbreaks and Environmental Microbiology (3)

ELECTIVES - (select 3 units)

HPS 401	Introduction to Mapping for Public Health (3)
HPS 409	Global Water, Sanitation and Hygiene (WaSH) (3)
EPID 411	Health and Disease Across Time and the World (3)
EHS 420	Environmentally Acquired Illnesses (3)
EHS 422	Safety Fundamentals (3)
EHS 426	Topics in Environmental Justice (3)
HPS 459	Management of Global Public Health Emergencies (3)
EHS 484	Fundamentals of Industrial and Environmental Health (3)
EHS 489	Public Health Preparedness (3)

Undergraduate Minor in Global Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 18 units are required for the undergraduate minor in Global Health. At the declaration of this minor, a minimum cumulative GPA of 2.0 is required.

DESCRIPTION:

Global health is an area for study, research, and practice that places priority on improving health and achieving health equity for all people worldwide. Given the increased awareness of the need for shared solutions to shared problems of humanity, opportunities in global health work abound. A Global Health minor will equip individuals who desire to work in this field with knowledge and skills to identify and delineate critical health and human development issues. Careers in global health present the opportunity to work with people from different backgrounds and to help those in need around the world.

NOTE: Students may apply 6 units toward a BA in Wellness and Health Promotion Practice.

REQUIRED - (15 units)

HPS 302	Introduction to Program Evaluation in Global Health (3)
HPS 433	Global Health (3)
HPS 409	Global Water, Sanitation and Hygiene (WaSH) (3)
HPS 459	Management of Global Public Health Emergencies (3)
HPS 417	Health Systems in Global Health (3)

ELECTIVES - (select 3 units)

EPID 309	Introduction to Epidemiology (3)
EPID 411	Health and Disease Across Time and the World (3)
HPS 493C	Global Experience in Public Health (1-3)
EHS 425	Public Health Lens to Climate Change (3)
EHS 420	Environmentally Acquired Illnesses (3)
HPS 400-801	Contemporary Community Health Problems (Study Abroad Section) (3)
PHPM 415	Strategic Planning (3)
HPS 404	Fundamentals of Evaluation (3)
HPS 416	The World's Food and Health (3)
GHI 414	Comparative Health Analysis from a Global Perspective (3)
GHI 440	Intercultural Communication for Health Sciences (3)

Undergraduate Minor in One Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 18 units are required for the undergraduate minor in One Health. At the declaration of this minor, a minimum cumulative GPA of 2.5 is required.

DESCRIPTION:

The One Health curriculum is designed to prepare students to tackle complex challenges in addressing zoonotic diseases. The minor in One Health aims to prepare students to have the foundational knowledge in One Health that can be applied in different settings for disease prevention while preparing others to pursue an advanced degree.

Students will take courses in different disciplines within the College and some electives outside the College. The College of Public Health has faculty expertise in different One Health relevant areas including Environmental Health Sciences, Epidemiology, Biostatistics, Global Health, Health Behavior and Health Promotion to name a few. All these disciplines are reflected in the proposed curriculum.

NOTE: *BS in Public Health majors cannot also be in the One Health minor.*

REQUIRED - (15 units)

EHS 100	One Health in Action (3)
EPID 309	Introduction to Epidemiology (3)
EPID/EHS 445	One Health Foundations (3)
EHS 446	One Health Approach and Case Studies (3)
EHS 425	Public Health Lens to Climate Change (3)

ELECTIVES - (select 3 units)

HPS 409	Global Water, Sanitation and Hygiene (WaSH) (3)
EHS 418	Introduction to Human Health Risk Assessment (3)
EHS 420	Environmentally Acquired Illnesses (3)
AI 431A	Traditional Ecological Knowledge (3)
CPH 432	Food in 2050 and Beyond: Climate Change and Global Health (3)
EHS 439A	Outbreaks and Environmental Microbiology: Then to Now (3)
HPS 456	A Circular Approach to Global indigenous Research (3)
CPH 457	Global Maternal Health: Cultural Perceptions and Policy Approaches (3)
ENV 477	Principles of Ecotoxicology (3)
CPH 481	Food System Preparedness for Global Emergency Risks (3)
EHS 489	Public Health Preparedness (3)

Undergraduate Minor in Population Health Data Science Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 18 units are required for the undergraduate minor in Population Health Data Science.

Admission to the minor requires a minimum cumulative 2.5 GPA. Course prerequisites to the program include: College Algebra (e.g. MATH 112) or higher-level MATH course.

DESCRIPTION:

The vision of the minor, Population Health Data Science, is to introduce students to the fundamentals of data science in the health sciences. Data science is emerging as a leading area for job growth over the next decade in the health sector. Expansion of health data sources, including electronic medical records and non-traditional health surveillance data necessitate the training of individuals who have an understanding both of the underlying dynamics of health and medicine and also skills in how to manage, analyze, interpret big data, and collaborate with higher level data scientists. We envision providing students with an introduction to the basics of how to apply data science to population health questions. The minor will be administered to be accessible both to individuals coming from the health fields including nursing, pharmacy, and medicine to learn about data science and for those coming from data science, math, computer science, neuroscience, and other disciplines to learn to about how to address issues in public health using appropriate data science tools.

NOTE: *BS in Public Health majors cannot also be in the Data Science Minor. Students may apply 6 units toward a BA in Wellness and Health Promotion Practice.*

REQUIRED - (18 units)

- EPID 309 Introduction to Epidemiology (3)
- BIOS 376 Introduction to Biostatistics (3)
- EPID/BIOS 450 Health Data Acquisition, Assessment, and Integration (3)
- BIOS/EPID 451 Health Data Management and Visualization (3)
- BIOS/EPID 452 Health Data Analysis and Communication Methods (3)
- EPID/BIOS 453 Health Data Science Practice (3)

Undergraduate Minor in Public Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 18 units are required for the undergraduate minor in Public Health.

Admission to the minor requires a minimum 2.0 GPA, and the student's minor GPA must be at least a 2.0 at the time of graduation. Please note that the Public Health minor cannot be added during priority registration. In addition, admission into the minor does not guarantee entry into College of Public Health courses.

REQUIRED - (9 units)

HPS 178	Personal Health and Wellness (3)
HPS 200	Introduction to Public Health (3)
EPID 309	Introduction to Epidemiology (3)

ELECTIVES - (9 units)*

HPS 300	Public Health in the 21st Century (3)
PHP 301	Introduction to Gerontology (3)
HPS 302	Introduction to Program Evaluation in Public Health (3)
PHP 305	Population Health in the Digital Age (3)
HPS 306	Drugs and Society (3)
HPS 307	Public Health Narratives (3)
PHP 308	Community Health Education for Disease Outbreaks (3)
PHPM 310	Health Care in the US (3)
PHP 312	Health Promotion and Well-being Later in Life (3)
HPS 313	Health and Medicine in Classic Antiquity (3)
EHS 320	Disaster Management and Response (3)
PHP 322	Health Education and Ethical Leadership (3)
GHI 325	Dietary Assessment in Public Health Practice (3)
HPS 330	Human Sexuality (3)
HPS 350	Principles of Health Education and Health Promotion (3)
EHS 375	Introduction to Environmental & Occupational Health (3)
BIOS 376	Introduction to Biostatistics (3)
HPS 387	Health Disparities and Minority Health (3)
HPS 394B	Introduction to Sleep Health Coaching (3)
CPH 399+	Independent Studies (1-4)
HPS 400	Contemporary Community Health Problems (3)**
HPS 401	Introduction to Mapping for Public Health (3)**

HPS 402	Corporate Wellness (3)**
HPS 403	Applications in Health Promotion Behavioral Theories & Health (3)**
HPS 404	Fundamentals of Evaluation (3)**
HPS 405	Biology in Public Health Research and Practice (3)**
PHPM 407	Health Economics and Policy (3)**
HPS 408	Disabilities and Public Health (3)**
HPS 409	Global Water, Sanitation, and Hygiene (WaSH) (3)**
EPID 411	Health and Disease Across Time and the World (3)**
HPS 412	Public Health Approaches to Mental Health Disorders in the US (3)**
GHI 413	Dissemination and Implementation Science and Applications in Public Health (3)**
GHI 414	Intercultural Communication for Health Sciences (3)**
PHPM 415	Strategic Planning (3)**
HPS 416	The World's Food and Health (3)**
HPS 417	Health Systems in Global Health (3)**
EHS 418	Introduction to Health Risk Assessment (3)**
EHS 420	Environmentally Acquired Illnesses (3)**
PHP 421	Introduction to Public Health Law and Ethics (3)**
EHS 422	Introduction to Occupational Safety (3)**

EHS 439A	Outbreaks and Environmental Microbiology: Then to Now (3)**
GHI 440	Comparative Health Analysis from a Global Perspective (3)**
PHP 440	Medicaid: Policy, Politics, and Practicalities of Access to Healthcare (3)**
HPS 444	Rethinking Race and Health in the United States (3)
EPID/EHS 445	One Health Foundations (3)**
EHS 446	One Health Approach and Case Studies (3)**
PHP 447	Case Studies in State Health Policy (3)**
HPS 449	Family Violence (3)**
EPID/BIOS 450	Health Data Acquisition, Assessment, and Integration (3)**

BIOS/EPID 451	Health Data Management and Visualization (3)**
BIOS/EPID 452	Health Data Analysis and Communication Methods (3)**
EPID/BIOS 453	Health Data Science Practice (3)**
EPID 454A	Healthy Aging in Action I (3)**
EPID 454B	Health Aging in Action II (3)**
PHPM 458	Health Care Marketing (3)**
HPS 459	Management of Global Public Health Emergencies (3)**
HPS 478	Public Health Nutrition (3)**
EPID 479	Infections and Epidemics (3)**
GHI 481	Food Systems Preparedness for Global Emergency Risks (3)**
HPS 481	Health Education Intervention Methods (3)**
EHS 484	Fundamentals of Industrial and Environmental Health (3)**
HPS/PHP 487	Feminist Interpretations of Health (3)
HPS 488	Adolescent Health (3)**
EHS 489	Public Health Preparedness (3)**
CPH 491+	Preceptorship (1-3)
CPH 492+	Directed Research (1-3)**
HPS 493B	(Elective) Internship in Public Health (1-6)**
EPID 495	Special Topics in Epidemiology (1-3)**
HPS 495	Special Topics in Public Health (1-3)**
HPS 497E	Public Health for Community Wellness (2)**
HPS 497F	Community and School Garden Workshop (2-6)**
HPS 497G	Open Airways for Schools (1)**
HPS 497L	Public Health for School and Community Based Obesity Prevention (2)**
EPID 497S	Skin Cancer Prevention in the Community Setting (1-2)**
EPID 497T	Case Investigations, Contact Tracing and Public Health Response (3)**
CPH 498+	Honors Thesis (1-3)**
CPH 499+	Independent Studies (1-4)**

NOTES

* Some elective courses may have additional prerequisites.

** Contact your minor advisor for enrollment.

+ CPH independent study courses can be taken from any program within the College of Public Health with course prefixes of BIOS, EHS, EPID, HPS, PHPM or PHP.

Undergraduate Minor in Wellness & Health Promotion Practice Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 18 units are required for the undergraduate minor in Wellness and Health Promotion Practice. At the declaration of this minor, a minimum cumulative GPA of 2.5 is required.

DESCRIPTION:

Required courses emphasize personal health and wellness as a foundation for life and future employment. Students learn to evaluate health promotion and wellness services and programming to assess whether programs are improving health. The minor offers a wide assortment of electives allowing students to customize courses to fit with their areas of interest. Several courses are available to develop skills in aging, mindfulness, and health education.

NOTE: Students may apply 6 units toward a BS in Public Health.

REQUIRED - (6 units)

HPS 178	Personal Health and Wellness (3)
HPS 404	Fundamentals of Evaluation (3)

ELECTIVES - (select 12 units)

HPS 200	Introduction to Public Health (3)
PHP 210	Diversity, Health and Wellbeing in Later Life (3)
CHS/SOC 215	Sociology of Aging and Health (3)
HPS 220	An Introduction to Contemporary Public Health Issues in LGBTQ+ Communities (3)
PHP 301	Introduction to Gerontology (3)
SBS 301A	Foundations of Mindfulness (1)
SBS 301B	Mindful Semester: Mindfulness-based Study Tools (1)
SBS 301C	Mindful Semester: Mindfulness-based Movement (1)
PHP 305	Public Health in the Digital Age (3)
HPS 306	Drugs in Society (3)
NSC 311	A Systems Approach to Obesity Prevention (3)
PHP 312	Health Promotion and Well-being in Later Life (3)
NSC 320	Nutrition, Physical activity and Health promotion (3)
PHP 322	Health Education and Ethical Leadership (3)
HPS 330	Human Sexuality (3)
NSC 332	Health Coaching (3)
HPS 350	Principles of Health Education and Promotion (3)

HPS 400	Contemporary Health Problems (3)
HPS 402	Corporate Wellness (3)
HPS 403	Applications in Health Promotion: Behavioral Theories & Health (3)
HPS 405	Biology in Public Health (3)
HPS 412	Public Health Approaches to Mental Health Disorders in the US (3)
HDFS 413	Issues in Aging (3)
HPS 416	The World's Food and Health (3)
EHS 425	A Public Health Lens to Climate Change (3)
PHP 436	Aging, Environment and Wellbeing (3)
PHP 437	Management and Leadership in Long-term Care (3)
HPS 449	Family Violence (3)
PHPM 458	Health Care Marketing (3)
HPS 478	Public Health Nutrition (3)
HPS 481	Health Education Intervention Methods (3)
HPS 488	Adolescent Health (3)

Undergraduate Certificate Programs

The University of Arizona Mel and Enid Zuckerman College of Public Health is committed to serving the public health educational needs of working professionals in the State of Arizona and beyond. We offer four undergraduate certificate programs designed for working professionals and/or those exploring the field of public health. Our undergraduate certificates provide skill enhancement for both domestic and international participants who have limited time to pursue a campus-based full degree program.

- The [Addiction and Substance Use](#) certificate will provide an overview of the psychological, physiological, chemical, and social elements of substance use, and equip students to provide effective, evidence-based interventions.
- The [Global Health](#) certificate is developed and implemented by public health experts with extensive experience of global health research and practice, and underpinned by the United Nations' Sustainable Development Goals as the guiding framework, the certificate in Global Health will equip participants with foundational knowledge and skills that are necessary to engage effectively in global health practice.
- The [One Health](#) certificate will provide the current and future public health workforce professional additional knowledge and skills regarding the protection of the public's health by being able to create better surveillance on the interaction between human health, animal health and the environment.
- The [Public Health Emergency and Epidemic Preparedness](#) certificate will provide participants with foundational knowledge and skills needed to support public health response to emergencies, epidemics, and pandemics. Individuals who successfully complete this certificate will also earn three FEMA certificates and a certificate in contact tracing.
- The [Safety](#) certificate focuses on occupational health and will provide educational training in safety topics relevant to a student's chosen career field. Individuals with specialized skills and education in safety matters related to higher-risk workplaces perform critical functions and promote positive safety culture in the organization.

Undergraduate Certificate in Addiction and Substance Use Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 12 units are required for the undergraduate certificate in Addiction and Substance Use.

DESCRIPTION:

The Addiction and Substance Use certificate provides a comprehensive overview of licit and illicit substances, substance use patterns, risks of use, types of substance use treatment, and disparities in access to treatment. It follows a bio-psycho-social framework that emphasizes the intersection of environmental, social, psychological, physiological, and pharmacological factors that contribute to substance use and substance use disorder. The three required public health courses establish this conceptual foundation, and the elective courses allow students to explore economic, social, and health implications. These include predictors of use as well as the prevention and treatment programs and policies. Delivered entirely online, participants can complete the certificate in one academic year.

NOTE: Students may apply 6 units toward an undergraduate bachelor's degree.

REQUIRED - (9 units)

PHPM 225	Introduction to Addiction and Substance Use (3)
HPS 306	Drugs and Society (3)
PHPM 448	Addiction and Substance Use Policy (3)

ELECTIVES - (3 units)

EPID 309	Introduction to Epidemiology (3)
HPS 302	Introduction to Program Evaluation in Global Health (3)
PHPM 310	Health Care in the US (3)
HPS 350	Principles of Health Education and Health Promotion (3)
HPS 387	Health Disparities and Minority Health (3)
HPS 404	Fundamentals of Evaluation (3)
HPS 442	Nicotine Dependence, Treatment and Coaching Intervention (3)

Undergraduate Certificate in Global Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 12 units are required for the undergraduate certificate in Global Health.

DESCRIPTION:

Developed and implemented by public health experts with extensive experience of global health research and practice, and underpinned by the United Nations' Sustainable Development Goals as the guiding framework, the Undergraduate Certificate in Global Health will equip participants with foundational knowledge and skills that are necessary to engage effectively in global health practice – whether at home in a diverse setting, along the border in bi-cultural environment, working side-by-side in indigenous homelands or abroad where populations and communities are displaced and under-resourced, and where health systems are severely constrained. Participants will be introduced to the world's vast array of determinants of health and disease. They will have an opportunity to critically appraise health systems in different parts of the world, and analyze current and emerging global health priorities, including infectious diseases, poverty, conflicts and emergencies, health inequity, principles and impact of health systems reforms, and major global initiatives for disease prevention and health promotion. Delivered entirely online, participants can complete the certificate in one academic year.

NOTE: *Students may apply 6 units toward a Bachelor of Science in Public Health or a Bachelor of Arts in Wellness and Health Promotion Practice.*

REQUIRED - (9 units)

EHS 100	One Health in Action (3)
HPS 302	Introduction to Program Evaluation in Global Health (3)
PHP 308	Community Health Education for Disease Outbreaks (3)

ELECTIVES – (3 units)

SPAN 341	Beginning Translation and Interpretation: Social Justice and Practice (3)
HPS 406	CURES Immersive Experience in Women's Research (3)
HPS 409	Global Water, Sanitation and Hygiene (WaSH) (3)
GHI 414	Comparative Health Analysis from a Global Perspective (3)
HPS 417	Health Systems in Global Health (3)
CPH 423	Health Promotion Approach to Address Health Inequity (3)
EHS 425	Public Health Lens to Climate Change (3)

Undergraduate Certificate in One Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 12 units are required for the undergraduate certificate in One Health. At the declaration of this certificate, students must have completed MATH 109C – College Algebra or higher and have a minimum cumulative GPA of 2.0.

DESCRIPTION:

The Undergraduate Certificate in One Health will provide the current and future public health workforce professional additional knowledge and skills regarding the protection of the public's health by being able to create better surveillance on the interaction between human health, animal health and the environment. Students will be able to complete the 12 unit program in one year. The Public Health workforce will upgrade their knowledge and skills regarding the importance of epidemiology, the environment, outbreaks and disease prevention and surveillance as in relation to protecting the Public's Health.

NOTE: Students may apply 6 units toward an undergraduate bachelor's degree.

REQUIRED - (12 units)

EHS 100	One Health in Action (3)
EHS 439A	Outbreaks and Environmental Microbiology: Then to Now (3)
EHS 420	Environmentally Acquired Infections (3)
HPS 433	Global Health (3)

Undergraduate Certificate in Public Health Emergency & Epidemic Preparedness Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 12 units are required for the undergraduate certificate in Public Health Emergency and Epidemic Preparedness. Course prerequisites to the program include: College Algebra (e.g. MATH 112) or higher- level MATH course.

DESCRIPTION:

The undergraduate certificate in Public Health Emergency and Epidemic Preparedness will provide participants with foundational knowledge and skills needed to support public health response to emergencies, epidemics, and pandemics. Participants in this 12-unit certificate program will gain an understanding of emergency management systems; they will be introduced to various forms of disasters and public health threats, as well as to essential public health response skills. Participants will be trained on how to use epidemiological tools to conduct rapid assessment and public health investigation of emergencies/disease outbreaks. Individuals who successfully complete this certificate will also earn three FEMA certificates and a certificate in contact tracing. Delivered fully online, this certificate program can be completed in one year.

NOTE: *Students may apply 6 units toward an undergraduate bachelor's degree.*

REQUIRED - (9 units)

EHS 110	Foundations of Disaster Management and Response (3)
EHS 320	Disaster Management and Response (3)
EPID 309	Introduction to Epidemiology (3)

ELECTIVES – (3 units)

EHS 100	One Health in Action (3)
EPID 411	Health and Disease Across Time and World (3)
EHS 420	Environmentally Acquired Illnesses (3)
HPS 433	Global Health (3)
EHS 439A	Outbreak & Environmental Microbiology: Then and Now (3)
HPS 459	Management of Public Health Emergencies (3)
EPID 479	Infections and Epidemics (3)
EHS 489	Public Health Preparedness (3)
EPID 497T	Case Investigations, Contact Tracing and Public Health Response (3)

Undergraduate Certificate in Safety Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 13 units are required for the undergraduate certificate in Safety. Course prerequisites to the program include: 2.0 gpa, College Algebra (e.g. MATH 112) or higher-level MATH course, and one semester Chemistry with lab (e.g. CHEM 141/145, CHEM 151, CHEM 130/130L).

DESCRIPTION:

The Undergraduate Safety Certificate will focus on occupational health and provide educational training in safety topics relevant to a student's chosen career field. Safety is of paramount importance in every workplace. Certain occupations involve risks and hazards beyond the usual everyday experience. Many industries employ safety officers to ensure that essential safety responsibilities of the organization are fulfilled.

Individuals with specialized skills and education in safety matters related to these higher- risk workplaces perform critical functions such as developing and enforcing safety rules and protocols, training and educating employees to safely perform their jobs, ensuring compliance with pertinent laws and regulations, performing risk assessment, and promoting positive safety culture in the organization.

NOTE: Students may apply 6 units toward an undergraduate bachelor's degree.

REQUIRED - (7 units)

EHS 375	Introduction to Environmental and Occupational Health (3)
EHS 422	Safety Fundamentals (3)
CHEM 405A	Basic Laboratory Safety (1)

ELECTIVES – (6 units)

EHS 418	Human Health Risk Assessment (3)
EHS 484	Fundamentals of Environmental and Occupational Health (3)
CHEM 405B	Advanced Laboratory Safety (1)
CHEM 405C	Chemical Hygiene and Regulations (1)
MNE 297A	Underground Mine Safety (1)
MNE 297C	Fundamentals of Mine Rescue (1)
MNE 423	Historic and Contemporary Role of US Regulatory Agencies (OSHA, MSHA, EPA) (3)
MNE 424	Miner Health: Fitness-for-Duty, Mitigating Exposures, and Managing Disease Risk (3)
MNE 425	Mine Emergencies and Disasters –Prevention, Response, and Recovery (3)
MNE 426	Health & Safety in Mining (1)
CE/CHEE 478	Hazardous Waste Management (3)

Accelerated BS & MPH in Environmental & Occupational Health

Yevheniia Varyvoda, PhD - Program Director

The Environmental Health Sciences Section has developed an accelerated five-year Bachelor of Science to Master of Public Health Degree option for exceptional students.

Students have the potential to experience the breadth of public health in the bachelor's program and focus on gaining environmental and occupational health (EOH) expertise in the Master of Public Health program. The combined, structured degree enables students to carefully choose electives that prepare them for the advanced courses and provide a broader exposure to EOH in 5 years instead of the 6 years that would be required to complete the degrees separately.

EOH specialists focus on the exposure of people to physical, biological and chemical hazards in the environment or workplace and their impact on health. Students can focus on either industrial hygiene or a broader environmental and occupational health track. The accelerated program covers the same information and addresses the same competencies as the two separate degrees. Students can replace elementary level courses in the bachelor program with deeper expertise provided in the master level coursework.

Students apply for Advanced Standing in the Public Health major after completion of 56 units in the undergraduate program with completion of specified courses. Students apply to the combined, accelerated MPH program after completing 75 credit hours of undergraduate work including at least a semester of organic chemistry, physics and college algebra (calculus is preferred).

A GPA of 3.3 or greater during the first two years of the undergraduate curriculum is required. Students are accepted following completion of 90 undergraduate credit hours. Students will begin the MPH curriculum their senior year as an undergraduate.

Accelerated BS/MPH – EOH Industrial Hygiene or Environmental & Occupational Health Concentration

Curriculum & Recommended Course Sequencing

Effective for those following the 2025/2026 academic curriculum guide

Incoming AP Courses Accepted – Composition, Calculus, Language, Biology, Chemistry, Physics			
FIRST YEAR			
Fall Semester-(17 undergraduate units)		Spring Semester- (17 undergraduate units)	
ENGL 101	First semester composition (3)	ENGL 102	Second semester composition (3)
MATH 112 (or higher)	College Algebra (3)	CHEM 152	Chemistry II (4)
CHEM 151	Chemistry I (4) (EP- Natural Scientist)	Exploring Perspectives: Artist	
NSC 170C1	Nutirition, Food, and You (3)	Exploring Perspectives: Humanist	
HPS 178	Personal Health and Wellness (3) (EP- Social Scientist)	Second language- First semester	
UNIV 101	Introduction to the General Education Experience (1)		
SUMMER SESSION FOLLOWING FIRST YEAR - Summer courses may be required for shortened graduation timeline			
SECOND YEAR			
Fall Semester- (17 undergraduate units)		Spring Semester- (17 undergraduate units)	
CHEM 241A & 243A	Organic Chemistry (5)	MCB 181L & R	General Biology (3)
HPS 200	Introduction to Public Health (3)	EHS 375	Introduction to Environmental & Occupational Health (3)
Second language- Second semester		HPS 350	Principles of Health Education (3)
Building Connections (3)		EPID 309	Introduction to Epidemiology (3)
Building Connections (3)		UNIV 301	General Education Portfolio (1)
		Building Connections (3)	
General Electives (check with Academic Advisor about exact units required given the student’s AP, transfer, etc. credit)			
Submit application for Advanced Standing in Public Health during the 4th semester			
SUMMER SESSION FOLLOWING SECOND YEAR - Summer courses may be required for shortened graduation timeline			

THIRD YEAR			
Fall Semester- (15 undergraduate units)		Spring Semester- (18 undergraduate units)	
PHPM 310	Health Care in the US (3)	HPS 433	Global Health (3)
PHYS 102	Introductory Physics (3)	HPS 478	Public Health Nutrition (3)
ENGL 307 or 308 OR HPS 307	Business or Technical Writing (3) Public Health Narratives (3)	HPS 405	Biology in Public Health (3)
Public Health Electives (3) (300 or 400 level)		Public Health Elective (3) (300 or 400 level)	
Public Health Elective (3) (300 or 400 level)		HPS 493A	Field Work in Public Health (6)
FOURTH YEAR			
Fall Semester - (12 graduate units, counted towards both programs)		Spring Semester - (12 graduate units)	
EPID 573A	Epidemiology (3)	EHS 553	Toxicology & Chemical Exposures (or EHS track approved course) (3)
BIOS 576A	Biostatistics (3)	EHS 655	Control of Occupational Exposures (or EHS track approved course) (3)
EHS 502	Environmental Monitoring Methods (3)	EHS 575	Environmental & Occupational Health (3)
EHS 584	Fundamentals of Industrial Hygiene & Environmental Health (3)	PHPM 574	Public Health Policy and Management (3)
		Master's Report Preparation Training (0)	
Student graduates with a BS with a major in Public Health (minimum 120 credit hours)			
FIFTH YEAR			
Fall Semester - (10 graduate units)		Spring Semester - (10 graduate units)	
HPS 577	Sociocultural & Behavioral Aspects of Public Health (3)	EHS 653	Applied Exposure Assessment (3)
EHS 522	Introduction to Occupational Safety (or EHS track approved course) (3)	EHS 510	Physical Exposures (or EHS track approved course) (3)
EHS 696R	Environmental & Occupational Health Seminar (1)	EHS 580	Integrated Public Health Learning Experience - MPH capstone course (1)
EHS 909	Master's Report (3)	EHS 696R	Environmental & Occupational Health Seminar (1)
		EHS 909	Master's Report (3)

Student Graduates with MPH

Total BS + MPH Credit Hours: 155 (including 2 Master's Reports)

Accelerated BS & MPH in Global Health

Gabriela Valdez, PhD - Program Director

The Health Promotion Services Department has developed an accelerated five-year Bachelor of Science to Master of Public Health Degree in Global Health option for exceptional students.

Students have the potential to experience the breadth of public health in the bachelor's program and focus on expertise in global health in the Master of Public Health program. The combined, structured degree enables students to carefully choose electives that prepare them for the advanced courses and provide a broader exposure to global health in 5 years instead of the 6 years that would be required to complete the degrees separately.

Global health specialists focus on international nutrition, maternal and child health issues, international and government policies, and epidemiology applied to global contexts. The accelerated program covers the same information and addresses the same competencies as the two separate degrees. Students can replace elementary level courses in the bachelor program with deeper expertise provided in the master level coursework.

Students apply for Advanced Standing in the Public Health major after completion of 56 units in the undergraduate program with completion of specified courses. Students apply to the combined, accelerated MPH program after completing 75 credit hours of undergraduate work. A GPA of 3.3 or greater during the first two years of the undergraduate curriculum is required.

Students are accepted following completion of 90 undergraduate credit hours. Students will begin the MPH curriculum their senior year as an undergraduate.

Elective OR CPH 557 +	(Approved by Faculty Mentor) (3) Global Maternal Health: Cultural Perceptions and Policy Approaches (3)	HPS 580	Integrated Public Health Learning Experience - MPH capstone course (1)

+ CPH 557 is offered in the fall semester only.

Master of Public Health

The Master of Public Health (MPH) degree is designed to be an interdisciplinary, graduate, professional degree in public health. The program provides opportunities for students to obtain broad knowledge and basic skills in the core areas of public health. Students are able to acquire proficiency in one or more specialized areas through advanced coursework, and gain experience in applying advanced knowledge to the solution of actual health problems in community settings during internship training.

The mission of the MPH program is to prepare students to assume public health leadership roles in the identification of community health problems, and in the planning, implementation and evaluation of programs and policies essential for the promotion of health and the alleviation of illness and disease. The MPH program is designed to meet the particular needs of the Southwestern United States, with emphasis on rural and urban medically underserved populations, including Hispanics, Native Americans, and other ethnic minority populations.

The MPH Program blends the strengths and experiences of the medical and health-related programs of The University of Arizona and the community health agencies of Arizona to provide a program of sufficient breadth and depth to offer high quality community-oriented graduate public health education.

Department of Epidemiology and Biostatistics

- Biostatistics
- Epidemiology
- One Health

Department of Community, Environment and Policy

- Environmental and Occupational Health with tracks in Environmental and Occupational Health (EOH) & Industrial Hygiene (IH)

Department of Health Promotion Sciences

- Family & Child Health
- Global Health
- Health Behavior Health Promotion

Division of Public Health Practice, Policy, and Translational Research

- Health Services Administration (Phoenix & Tucson campuses)
- Public Health Policy and Management
- Public Health Practice (Based at the Phoenix campus)

Master of Public Health (MPH) Degree Concentrations

The UA Zuckerman College of Public Health offers a MPH program in which students acquire a sound academic background for competent practice in the field of public health. The MPH program is a two-year program for full-time students; part-time students may take up to six years to complete the program. MPH students select one of the concentration areas listed below. Dual degree options are also available, including the MPH/MA in Latin American Studies, the DNP/MPH with the College of Nursing, and the MPH/MS in Mexican American Studies, the MD/MPH with the College of Medicine, the JD/MPH with the College of Law, the MBA/MPH with Eller College of Management, and the PharmD/MPH with the College of Pharmacy.

Biostatistics

The Biostatistics area of study's educational objective is to prepare individuals to apply statistical methods to the solution of problems encountered in such fields as public health, medicine, nursing, pharmacy and dentistry. Biostatisticians collaborate with scientists and investigators in nearly every area related to health and have made major contributions to our understanding of diseases such as AIDS, cancer, and coronary heart disease.

Climate Change and Health

Students who graduate with an MPH concentration in Climate Change and Health will learn to integrate and implement a portfolio of public health methods to address the impacts of climate change on human health, animal health, and the environment. They will gain the ability to analyze health and environmental data, to collaborate across sectors to develop innovative solutions, and to deliver assessments and policies that translate research into action. This set of skills will prepare students to collaboratively build climate resilience within communities and themselves, and heal our warming world.

Environmental and Occupational Health

The Environmental and Occupational Health area of study prepares individuals to evaluate and control health risks posed by chemical and biological contaminants and physical exposures (noise, heat and radiation) in occupational and community environments. Those interested in industrial hygiene may be eligible to receive funds through the NIOSH training program. Faculty members have experience in industrial hygiene, occupational and environmental health, safety, ergonomics, toxicology, microbiology, exposure modeling, occupational and preventive medicine, environmental sciences, engineering and epidemiology.

Epidemiology

Epidemiology is a fundamental science of public health with a major focus on health problems in communities, groups, or aggregates of people. Individuals who choose this concentration will have the opportunity to acquire knowledge, skills and experiences for measuring and studying the distributions, characteristics, causes, and prevention of disease, disability, and premature death in humans. The Epidemiology concentration prepares students to work proficiently with tasks related to epidemiological study design, data collection, data analysis, critical assessment of the literature and study presentations in public health.

Family and Child Health

The Family and Child Health (FCH) area of study focuses on promoting the health and well-being of families. Course work emphasizes issues relevant to women, children, and adolescents and develops knowledge and skills in epidemiology, planning and evaluation, and community engagement. Course offerings include Maternal and Child Health (MCH), MCH epidemiology, adolescent health, and family violence or mental health. Students also immerse themselves in real-world, practical experiences through service-learning courses.

Global Health

The Global Health (GH) area of study will provide students with core public health skills, history of global responses to health problems, and a rich understanding of the social, environmental, political and economic determinants of health in a global setting. GH faculty have a depth of experience in international contexts conducting research, establishing clinics, and implementing community-based health education programs. Course offerings include global health, international nutrition, infectious disease epidemiology, and changing health policy.

Health Behavior Health Promotion

The Health Behavior Health Promotion (HBHP) concentration is founded on a philosophy of health education, health promotion, and disease prevention to improve the quality of life of individuals, families and communities. HBHP focuses on sociocultural factors that influence health and health behavior; scientific and theoretical bases for planning, implementing, and evaluating effective public health education, health promotion and disease prevention programs; and the goal of facilitating behavior change for healthy life.

Health Services Administration (*Tucson and Phoenix Campuses*)

The Health Services Administration (HSA) concentration is a unique combination of public health and health care administration courses, which will provide individuals with the tools they need to understand the multifaceted administrative and business aspects of health care. The Health Services Administration curriculum is comprised of specifically targeted courses, with a goal to graduate highly qualified health care administrators.

One Health

The One Health curriculum model recognizes that multi-disciplinary efforts at the intersection between humans, animals and their respective environments are needed to solve complex diseases and public health concerns. These approaches to understanding disease can be visible at the local level but also are needed at a global level. The MPH in One Health will train students in the theory and application of utilizing One Health approaches to address complex public health challenges. Expertise is drawn from all three MEZCOPH departments as well as Colleges and Schools across the University.

Public Health Practice (PHP) *(Based at the Phoenix Campus)*

The Public Health Practice concentration prepares students to work effectively as part of multidisciplinary teams to develop, manage and evaluate public health programs that are appropriate for decreasing health disparities. Coursework includes: core areas of public health and skills in the administration and fiscal management of programs within diverse populations.

Master of Public Health Degree Requirements

The Master of Public Health (MPH) degree is comprised of core courses, required concentration courses, elective courses, and an applied practice experience. Each student will also be required to produce a comprehensive, analytical, problem solving report integrating the in-class learning with a portfolio that includes two products from their applied practice experiences. An oral presentation of the material before a student and faculty colloquium, reporting on activities during the applied practice experience, and relating those activities to broader public health issues is required. Additionally, all MPH students must participate in at least two interprofessional education (IPE) programs, or events that are available through various MEZCOPH courses, and the Arizona Health Sciences Center's IPE activities. Documentation of IPE participation is required for graduation. To prepare them for IPE activities, students are required to read the following articles prior to participating:

1. Xyrichis A and Lowton K. (2008) What fosters or prevents interprofessional teamworking in primary and community care? A literature review. *International Journal of Nursing Studies* 45:140-153
2. U.S. Department of Health and Human Services. Multiple Chronic Conditions Initiative. Education and Training Curriculum on Multiple Chronic Conditions. Module 4. Interprofessional Collaboration. Washington, DC. June 2015.

Detailed information on the requirements for each concentration area follows.

Master of Public Health in Biostatistics and Health Data Science

Paul Hsu, PhD - Program Director

The MPH program in Biostatistics is offered by the [Department of Epidemiology and Biostatistics](#). The educational objective of the MPH degree in Biostatistics and Health Data Science is to prepare individuals to work effectively as biostatisticians/data scientists in a variety of public health, epidemiological and clinical research settings. Candidates for admission may come from medical and public health backgrounds but applicants from all academic backgrounds will be considered. Applicants should possess 1) a demonstrated interest and/or experience in the area of biostatistics, 2) in the case of a deficient overall GPA, evidence that recent performance significantly exceeds the past average, and 3) evidence of personal qualities that suggest the ability to commit and succeed in the course of studies. While courses in statistics are not required as prerequisites, students should have had college level calculus and/or linear algebra. The MPH in Biostatistics and Health Data Science program level competencies on the [program website](#) define professional skills that students are expected to acquire upon graduating from the program.

MPH – Biostatistics

Curriculum & Recommended Course Sequencing

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED CORE COURSES - (16 units)

EPID 573A	Basic Principles of Epidemiology (3)
PHPM 574	Public Health Policy & Management (3)
EHS 575	Environmental & Occupational Health (3)
BIOS 576A	Biostatistics in Public Health (3)
HPS 577	Sociocultural & Behavioral Aspects of Public Health (3)
BIOS 580	Integrated Public Health Learning Experience - MPH capstone course (1)

Must be taken after other core courses are completed; should not be taken concurrently

Master's Report Preparation Workshop (**required**; non-credit; semester before applied practice experience begins)

Interprofessional Education Activities (**documentation required**; non-credit)

REQUIRED BIOSTATISTICS COURSES - (14 units)

BIOS 576B	Biostatistics for Research (3)
BIOS 576C	Applied Biostatistics Analysis (3)
BIOS 680	Biostatistical Methods I: Clinical Trials/Survival Analysis (3)
BIOS 909	Master's Report (5)

ELECTIVE COURSES - (minimum 12 units)

All 3-unit 500 or 600 level BIOS courses

Other elective courses:

EPID 677	Genetic Association Studies (3)
STAT 571A	Advanced Statistical Regression Analysis (3)
STAT 571B	Design of Experiments (3)
STAT 675	Statistical Computing (3)

At most 6 elective credits may be applied from BIOS 550, BIOS 551, and BIOS 552

Total Required Credit Hours: 42

MPH Biostatistics Recommended Course Sequencing

Effective for those following the 2025/2026 academic curriculum guide

FIRST YEAR			
Fall Semester- (9 units)		Spring Semester- (9 units)	
BIOS 576A*	Biostatistics in Public Health (3)	BIOS 576B ¹	Biostatistics for Research (3)
EPID 573A*	Basic Principles of Epidemiology (3)	PHPM 574*	Public Health Policy & Management (3)
EHS 575*	Environmental & Occupational Health (3)	HPS 577*	Sociocultural & Behavioral Aspects of Public Health (3)
		Master's Report Preparation Workshop (required ; non-credit)	
SECOND YEAR			
Fall Semester - (12 units)		Spring Semester - (12 units)	
BIOS 576C ¹	Applied Biostatistics Analysis (3)	BIOS 680 ²	Biostatistical Methods I: Clinical Trials/Survival Analysis (3)
Elective(s)	(From the eligible elective courses) (9)	BIOS 909**	Master's Report (5)
		Elective	(From the eligible elective courses) (3)
		BIOS 580	Integrated Public Health Learning Experience - MPH capstone course (1)
IMPORTANT GUIDELINES			
Bolded courses in first fall semester indicate essential courses for the student to take that semester.			
* MPH required core courses are offered fall & spring semesters, allowing flexibility. The modality and number of offerings may vary by semester and are subject to change. All five 3-unit Core Courses must be complete prior to the student's final term in the program.			
** Prerequisites for BIOS 909 – Master's Report: At least 3 MPH core courses and BIOS 576A and BIOS 576B. BIOS 909 may be taken in one or more semesters and the credits may be split across semesters. Final report cannot be submitted until all five 3-unit core courses have been completed.			
¹ Offered in the Fall Semester.			
² BIOS 680 is only offered in the Spring Semester.			

Master of Public Health in Climate Change and Health

Climate change stands as the single biggest threat facing humanity. The MPH concentration in Climate Change and Public Health provides the crucial public health knowledge, data analysis skills, and program implementation abilities needed to respond to the many climate-driven health risks we are facing. Students take courses offered across multiple programs in the College of Public Health including health promotion, epidemiology, and environmental health sciences.

The MPH in Climate Change and Health program level competencies on the program website define professional skills that students are expected to acquire upon graduating from the program. Each student, under the guidance of a faculty mentor, will develop an individualized plan of study and an applied practice experience for their specialized area of interest.

In addition to the general admission requirements for the MPH Program, factors considered in the determination of a candidate's potential for success in the CCH concentration include work or volunteer experience and letters of recommendation. The CCH concentration encourages people with a variety of professional and academic backgrounds to apply.

MPH – Climate Change and Health Curriculum & Recommended Course Sequencing

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED CORE COURSES - (16 units)

BIOS 576A*	Biostatistics in Public Health (3)	CPH/GHI 532	Food in 2050 and Beyond: Climate Change and Global Health (3)
PHPM 574*	Public Health Policy & Management (3)	Master's Report Preparation Workshop (required; non-credit)	
SECOND YEAR			
Fall Semester - (12 units)		Spring Semester - (9 units)	
CPH 502	Climate and Health (3)	HPS 533 ¹	Global Health (3)
EPID/EHS 545	One Health Foundations (3)	EHS 909**	Master's Report (5)
CPH/GHI 566	Climate Change and Health Policy, Communication and Community Engagement (3) (7 WK 2)	EHS/EPID/ HPS 580 ²	Integrated Public Health Learning Experience - MPH capstone course (1)
Elective(s)	(From the eligible elective courses) (3)		
IMPORTANT GUIDELINES			
Bolded courses in first fall semester indicate essential courses for the student to take that semester.			
* MPH required core courses are offered fall & spring semesters, allowing flexibility. The modality and number of offerings may vary by semester and are subject to change. All five 3-unit Core Courses must be complete prior to the student's final term in the program.			
** Prerequisites for 909 units – Master's Report: At least 3 MPH core courses and EHS 525. 909 units may be taken in one or more semesters and the credits may be split across semesters. Final report cannot be submitted until all five 3-unit core courses have been completed.			
¹ HPS 533 is offered only in the spring semester			
² Students should enroll in either EPID/EHS/HPS 580 based on the student's 909 Master's Report units department.			

Master of Public Health in Environmental and Occupational Health

Yevheniia Varyvoda, PhD - Program Director

The MPH degree in Environmental and Occupational Health (EOH) is offered by the [Department of Community, Environment and Policy](#). There are two tracks available for students to pursue: Environmental and Occupational Health (EOH) and the Industrial Hygiene (IH) track. Both tracks prepare individuals to evaluate and control health risks posed to communities and workers by chemical/biological contaminants and physical exposures.

Our faculty has expertise in: occupational safety, toxicology, occupational medicine, ergonomics, industrial hygiene, epidemiology, microbiology, environmental science, environmental modeling and engineering, exposure and risk assessment. As part of the coursework, students are required to do an internship. Students will work with a faculty mentor to develop an individualized plan of study that best meets personal professional goals.

The EOH track provides flexibility in selection of electives and emphasis areas and requires 42 credit hours for completion. The IH track provides a greater focus on worker protection. Additional courses are required and the track requires 45 credit hours. Those interested in worker protection may be eligible to receive funds through the NIOSH training program.

Students selecting the EOH concentration area should have a strong background in the basic sciences. In addition to the general admission requirements for the MPH, inorganic chemistry is required for admission to the EOH track, and organic chemistry is highly recommended. Students interested in the [MPH-Industrial Hygiene](#) track must have one year of inorganic chemistry, one semester of organic chemistry and one semester of physics, in addition to the general MPH admission requirements. The MPH in Environmental and Occupational Health (EOH) program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program.

MPH – EOH (IH Track)

Curriculum & Recommended Course Sequencing

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED CORE COURSES - (16 units)

EPID 573A	Basic Principles of Epidemiology (3)
PHPM 574	Public Health Policy & Management (3)
EHS 575	Environmental & Occupational Health (3)
BIOS 576A	Biostatistics in Public Health (3)
HPS 577	Sociocultural & Behavioral Aspects of Public Health (3)
EHS 580	Integrated Public Health Learning Experience - MPH capstone course (1)
Must be taken after other core courses are completed; should not be taken concurrently	

Master's Report Preparation Workshop (**required**; non-credit; semester before internship begins)
Interprofessional Education Activities (**documentation required**; non-credit)

REQUIRED EOH COURSES - (17 units)

EHS 502	Environmental Monitoring and Analysis (3)
EHS 584	Fundamentals of Industrial and Environmental Health (3)
EHS 653	Applied Exposure Assessment (3)
EHS 696R	Environmental & Occupational Health Seminar (1 unit –2 times)
EHS 909	Master's Report (6)

REQUIRED COURSES FOR IH TRACK - (9 units)

EHS 510	Physical Exposures (3) –Spring odd years
EHS 553	Toxicology and Chemical Exposures (3)
EHS 655	Control of Occupational Exposures (3)

RECOMMENDED COURSE FOR IH TRACK

EHS 522	Introduction to Occupational Safety (3)
---------	---

Total Required Credit Hours: 42

MPH EOH (IH Track) Recommended Course Sequencing (odd year program entry)
Effective for those following the 2025/2026 academic curriculum guide

FIRST YEAR			
Fall Semester- (13 units)		Spring Semester- (12 units)

Master of Public Health in Epidemiology

Heidi Brown, PhD, MPH- Program Director

The MPH in Epidemiology is offered by the [Department of Epidemiology and Biostatistics](#). Epidemiology is a fundamental science of public health with a major focus on health problems in communities, groups, or aggregates of people. The Epidemiology concentration curriculum provides systematic training in epidemiological principles, methods, and practices through constructive coursework and an internship. Individuals who choose the epidemiology concentration will have the opportunity to acquire knowledge, skills and experiences for measuring and studying the distributions, characteristics, causes, and prevention of disease, disability, and premature death in humans. The MPH in Epidemiology program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program. Students accepted into this discipline should have a good background in the biological sciences and mathematics. In addition to the general admission requirements for the MPH program, other factors considered in the determination of a candidate's potential for success in the epidemiology concentration area are long range goals and commitment to both public health and epidemiology; experience/interest in applying epidemiological principles to public health; and work and volunteer experience in epidemiology.

MPH – Epidemiology

Curriculum & Recommended Course Sequencing

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED CORE COURSES - (16 units)

EPID 573A	Basic Principles of Epidemiology (3)

IMPORTANT GUIDELINES	
Bolded courses in first fall semester indicate essential courses for the student to take that semester.	
* MPH required core courses are offered fall & spring semesters, allowing flexibility. The modality and number of offerings may vary by semester and are subject to change. All five 3-unit Core Courses must be complete prior to the student's final term in the program.	
** Prerequisites for EPID 909 – Master's Report: At least 3 MPH core courses, EPID 573B, and BIOS 576B before starting Report. EPID 909 typically is taken in multiple semesters with the credit hours split across semesters. Note: The final report may not be completed until the semester following the completion of all five MPH core courses.	
+ Students who require full time graduate status for loan/scholarship disbursement may need to take more units than the sequencing recommends.	
¹ This course only offered in this specific semester; not in both fall and spring semesters	
² This course is offered both fall and spring semesters	
³ Note: Students planning an infectious disease related MPH Master's Report are encouraged to take EPID 660 spring year 1. EPID 660 and HPS 577 are offered during the same time slot during the spring semester; plan accordingly.	

Master of Public Health in Family and Child Health

Christina Cutshaw, PhD - Program Director

The MPH degree in Family and Child Health is offered by the [Department of Health Promotion Sciences](#). The Family and Child Health (FCH) concentration provides students a curriculum that addresses the history and current status of the socioeconomic, cultural, political and physiological issues that affect the health of women, children, and families in the United States and globally. Course work in the Maternal and Child Health (MCH) specialized area has a greater emphasis on domestic MCH mortality and morbidity, interventions and policy. Each student, under the guidance of a faculty mentor, will develop an individualized plan of study for their specialized area of interest. The MPH in Family and Child Health program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program.

In addition to the general admission requirements for the MPH Program, factors considered in the determination of a candidate's potential for success in the FCH concentration include work or volunteer experience with underserved populations. The FCH concentration encourages people with a variety of professional and academic backgrounds to apply. Our graduates include nurses, nutritionists, social workers, teachers, physicians, program planners and evaluators, working in a variety of settings.

Master of Public Health in Global Health

Gabriela Valdez, PhD - Program Director

The MPH degree in Global Health is offered by the [Department of Health Promotion Sciences](#). The Global Health (GH) concentration provides students a curriculum that addresses the history and current status of the socioeconomic, cultural, political and physiological issues that affect the health in a global setting. Course work in Global Health emphasizes core public health skills, qualitative and quantitative research methods, proposal development, monitoring and evaluation, history of global response to health issues, and an in-depth understanding of sociopolitical, economic, and environmental determinants of health.

Each student, under the guidance of a faculty mentor, will develop an individualized plan of study for their specialized area of interest. The MPH in Global Health program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program.

In addition to the general admission requirements for the MPH Program, factors considered in the determination of a candidate's potential for success in the GH concentration include work or volunteer experience with underserved populations. The GH concentration encourages people with a variety of professional and academic backgrounds to apply. Our graduates include nurses, nutritionists, social workers, teachers and physicians.

Master of Public Health in Health Behavior Health Promotion

Nicole Yuan, PhD, MPH - Program Director

The MPH in Health Behavior Health Promotion (HBHP), offered by the Department of Health Promotion Sciences, is based on a philosophy of health education, health promotion, and disease prevention, to improve the quality of life of individuals, families and communities. The HBHP discipline focuses on three areas:

1. Sociocultural factors that influence health and health behavior;
2. Scientific and theoretical basis for planning, implementing, and evaluating effective public health education, health promotion and disease prevention programs; and
3. Facilitating behavior changes for healthy living.

The program provides students with the opportunity to acquire the knowledge and skills that are essential for the promotion of health and prevention of disease in culturally diverse populations. Specific competencies that students are expected to acquire include: a working knowledge of sociocultural factors that influence health, an ability to plan culturally appropriate and effective public health interventions, knowledge and skills relating to the application of sociocultural principles to health promotion and disease prevention programs, culturally relevant service delivery that facilitates positively changed health behaviors, and appropriate methods and skills to effectively plan, implement, and evaluate public health programs.

The Health Behavior Health Promotion concentration places a strong emphasis on the following factors in its determination of a candidates' potential for success in the concentration: long range goals and commitment to public health; successful leadership experience or potential; work and volunteer experience related to the concentration's public health focus; demonstrated community service; public health experience or interest; documented experience and/or commitment to underserved areas and populations. The personal statements of students applying for admission to the Health Behavior Health Promotion concentration should include information regarding these factors. The MPH in Health Behavior Health Promotion program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program.

FIRST YEAR			
Fall Semester- (13 units)		Spring Semester- (10 units)	
HPS 531 ¹	Contemporary Health Issues & Research (3)	HPS 532A ^{1,2}	Applied Aspects of Program Planning, Implementation & Evaluation I (4)
EPID 573A*	Basic Principles of Epidemiology (3)	PHPM 574*	Public Health Policy and Management (3)
BIOS 576A*	Biostatistics in Public Health (3)	Elective	(Approved by Faculty Mentor) (3)
HPS 577*	Sociocultural & Behavioral Aspects of Public Health (3)	Master's Report Preparation Workshop (required; non-credit)	
597 Service Learning Course (1)# (recommended)		597 Service Learning Course (1)# (recommended if elective units remain unfulfilled)	
Service Learning 597 course (1)# (offered all semesters)			
SECOND YEAR			
Fall Semester- (11 units)		Spring Semester- (8 units) ³	
HPS 535 ^{1,2}	Multicultural Health Beliefs (3)	HPS 580	Integrated Public Health Learning Experience - MPH capstone course (1)
EHS 575*	Environmental & Occupational Health (3)	HPS 909**	Master's Report (4)
HPS 909**	Master's Report (1)	Elective	(Approved by Faculty Mentor) (3)
Elective	(Approved by Faculty Mentor) (3)	597 Service Learning Course (1)# (recommended if elective units remain unfulfilled)	
597 Service Learning Course (1)# (recommended)			
IMPORTANT GUIDELINES			
Bolded courses in first fall semester indicate essential courses for the student to take that semester.			
* MPH required core courses are offered fall & spring semesters, allowing flexibility. The modality and number of offerings may vary by semester and are subject to change. All five 3-unit Core Courses must be complete prior to the student's final term in the program.			
** Prerequisites for HPS 909 – Master's Report - HBHP Track: At least 3 MPH core courses and HPS 532A. Final report cannot be submitted until all five 3-unit core courses have been completed.			
1 This course only offered in this specific semester			
2 Prerequisites for – HPS 532A: HPS 531 and HPS 577 HPS 535: HPS 577			
3 Students who require full time graduate status for loan/scholarship disbursement may need to take more units than the sequencing recommends.			

Service Learning courses (597 A-G & S) are strongly recommended to meet 1-2 elective credit options, suggestions include course prefixes of HPS, EPID, PHP, or PHPM. Other potential courses that might fulfill this requirement would require approval by the Program's Director. Service Learning courses are offered all semesters. Please consult the schedule of classes for exact course dates.

Choose from the following Service Learning Courses:

EPID 597S	Skin Cancer Prevention in the Community Setting (1-2) – (offered Fall and Spring)
HPS 597A	Maternal & Child Health Programs in Urban Settings (1)
HPS 597B	Maternal & Child Health Programs in the Rural Southwest (1)
HPS 597E	Public Health for Community Wellness (2) – (offered Fall and Spring)
PHP 597C	Border Health Service Learning Institute (1)
PHP 597F	Phoenix Urban Service Learning (1)
PHPM 597D	Rural Health Service Learning Institute (1)

Master of Public Health in Health Services Administration

Amanda Soka, PhD, MHA, LL.B - Program Director

Terry Urbine, PhD - Program Director

(Phoenix and Main Campuses)

The Master of Public Health in [Health Services Administration](#) is an accredited interdisciplinary College-wide program that prepares students to develop the skills needed to work in a variety of health related organizations such as health systems, health agencies, third party payers and/or health care supply chain organizations in both governmental and non-governmental settings.

The unique combination of public health and health care administration classes in this accredited curriculum will provide students with the tools they need to understand the multifaceted administrative and business aspects of health care. The Health Services Administration curriculum is comprised of specifically targeted courses, with a goal to graduate highly qualified health care administrators. The MPH in Health Services Administration program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program.

Master of Public Health in One Health

Kristen Pogreba-Brown, PhD, MPH - Faculty Lead

The MPH in One Health is offered as a MEZCOPH interdisciplinary concentration administered through the [Department of Epidemiology and Biostatistics](#). The One Health paradigm recognizes that multi-disciplinary efforts at the intersection between humans, animals and their respective environments are needed to solve complex diseases and public health concerns.

These approaches to understanding disease can be visible at the local level but also are needed at a global level. The MPH in One Health will train students in the theory and application of utilizing One Health approaches to address complex public health challenges. Expertise is drawn from all three MEZCOPH departments as well as Colleges and Schools across the University.

The One Health curriculum focuses on the interconnectedness of health among human, animal and environmental systems and how to work within a multi-disciplinary team. The most important aspects of working under this model are Collaboration and Partnership; Informatics and Data Management; Culture, Beliefs, Values and Ethics; Leadership; Management; Policy, Advocacy and Regulation; and Systems Thinking – all of which are embedded concepts and competencies in our core MPH courses, required courses and various recommended electives. The MPH in One Health program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduation from the program.

MPH – One Health

Curriculum & Recommended Course Sequencing

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED CORE COURSES - (16 units)

EPID 573A	Basic Principles of Epidemiology (3)
PHPM 574	Public Health Policy & Management (3)
EHS 575	Environmental & Occupational Health (3)
BIOS 576A	Biostatistics in Public Health (3)

Master of Public Health in Public Health Policy & Management

Bryna Koch, DrPH - Interim Program Director

The MPH in Public Health Policy and Management is offered by the [Public Health Practice, Policy and Translational Research Department](#). The Public Health Policy and Management concentration prepares MPH students to fill leadership roles in the public or private sector, craft and implement policies that improve the health and well-being of specific populations, and manage public health programs including those targeting the unique populations residing in the Southwest.

The MPH in Public Health Policy and Management (PHPM) program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program. Graduates are expected to competently:

- Use evidence-based concepts to critique the financing and delivery of medical services in the United States.
- Provide leadership in public and private organizations; manage programs and projects; and utilize critical thinking, systems thinking, and self-reflection to resolve technical problems, ethical challenges and interpersonal conflicts.
- Construct and interpret budgets using standard finance principles.
- Describe the state and federal processes that govern the delivery of health services.
- Collaborate with local advocacy groups, analyze public health problems, formulate legislative solutions, and develop evidence-based recommendations that justify government intervention.

The PHPM concentration places a strong emphasis on the following factors to determine a candidate's potential for success:

- demonstrated interest in improving the health and well-being of vulnerable populations including the rural, border and indigenous populations of the Southwest.
- a commitment to increasing public health resources, improving availability of health care services and fostering greater self-determination among individuals and communities.
- ability to acquire and use knowledge as evidenced by academic achievement in the classroom and on standardized examinations.
- ability to effectively communicate with others verbally and in writing.
- interest in health policy development and evidenced-based decision-making as evidenced by formal coursework and/or experience in health economics, health outcomes, health services administration or quality-improvement.

Master of Public Health in Public Health Practice

Amanda Soka, PhD, MHA, LL.B- Program Director

Terry Urbine, PhD- Program Director

(Based at the Phoenix Campus)

The Master of Public Health in [Public Health Practice](#) is an interdisciplinary College-wide program that prepares students to develop the public health skills needed to work in a variety of governmental and non-governmental settings including the local, county and state departments of health, the Indian Health Service, Medicaid and Medicare programs, hospitals, and community health centers. Students learn to work effectively as part of multidisciplinary teams to develop, manage and evaluate public health programs designed to address health disparate populations.

Students selecting the Public Health Practice program should possess an academic background in a public health related field and/or experience working or volunteering within at least one public health program.

The MPH in Public Health Practice program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program.

Online Master of Public Health

Christina Cutshaw, PhD- Director, Online Programs

The online MPH curriculum combines a strong foundation in the core principles of public health with the option to choose one of three distinct concentrations. These concentrations reflect the most vital areas of public health and prepare students for in-demand careers. These concentrations are not light forays into each discipline, in fact, they make up exactly half of the course work in the 42-credit program. In as few as two years you can graduate with the skills and expertise to be a leader in public health.

The MPH program is a year-round program; full-time online students generally take two courses a semester in 7.5 week sessions. Credits may increase as internship units are added in year two of the program. MPH students are required to select one of the six concentration areas: Applied Epidemiology, Climate Change and Health, Global Health, Health Services Administration, Health Behavior Health Promotion, or Population, Aging, and Long term Care. Each of the online MPH concentrations have program level competencies detailed on the [program website](#). These define professional skills that students are expected to acquire upon graduation.

MPH – Applied Epidemiology (Online Campus) Curriculum

Effective for those following the 2025/2026 academic curriculum guide

This concentration provides a background for individuals interested in the causes and prevention of human disease. The curriculum provides systematic training in measuring and studying the distribution, characteristics and causes of disease across demographics. Epidemiology is a fundamental science of public health and is essential for students whose careers will focus on conducting investigator-initiated and collaborative epidemiologic research.

REQUIRED CORE COURSES - (19 units)

PHPM 569	Fundamentals of Health Budgeting & Financial Management (3)
EPID 573A	Basic Principles of Epidemiology (3)
PHPM 574	Public Health Policy & Management (3)
EHS 575	Environmental & Occupational Health (3)
BIOS 576A	Biostatistics in Public Health (3)
HPS 577	Sociocultural & Behavioral Aspects of Public Health (3)
EPID 580	Public Health Integrated Learning Experience - MPH capstone course (1)

Master's Report Preparation Workshop (**required**; non-credit; semester before internship begins)

Interprofessional Education Activities (**documentation required**; non-credit)

REQUIRED APPLIED EPIDEMIOLOGY COURSES - (23 units)

EPID 555	Introduction to Maternal & Child Health Epidemiology (3)
EPID 572B	Applied Epidemiologic Method (3)
EPID 572C	Analysis of Public Health Data (3)
BIOS 576B	Biostatistics for Research (3)
EPID 579	Applied Infectious Disease Epidemiology (3)
HPS 628	Public Health Research & Evaluation (3)
EPID 909	Master's Report (5)

Total Required Credit Hours: 42

MPH – Health Services Administration (Online Campus) Curriculum

Effective for those following the 2025/2026 academic curriculum guide

This concentration offers a combination of public health and health care administration classes that provides students with a multifaceted understanding of the administrative and business aspects of health care. Use the skills learned in the curriculum to pursue leadership roles in both governmental and non- governmental settings.

REQUIRED CORE COURSES - (19 units)

PHPM 569	Fundamentals of Health Budgeting & Financial Management (3)
EPID 573A	Basic Principles of Epidemiology (3)
PHPM 574	Public Health Policy & Management (3)
EHS 575	Environmental & Occupational Health (3)
BIOS 576A	Biostatistics in Public Health (3)
HPS 577	Sociocultural & Behavioral Aspects of Public Health (3)
PHP 580	Public Health Integrated Learning Experience - MPH capstone course (1)
Master's Report Preparation Workshop (required ; non-credit; semester before internship begins)	
Interprofessional Education Activities (documentation required ; non-credit)	

REQUIRED COURSES - (23 units)

PHPM 507	Health Care Economics & Policy (3)
PHPM 558	Health Care Marketing (3)
PHPM 561	Introduction to Health Care Quality & Safety (3)
PHPM 562	Health Services Administration (3)
PHPM 608A	Public Health Law and Ethics (3)
PHP 641	Health Systems Delivery (3)
PHP 909	Master's Report (5)

Total Required Credit Hours: 42

MPH – Health Behavior Health Promotion (Online Campus) Curriculum

Effective for those following the 2025/2026 academic curriculum guide

This concentration provides students with the opportunity to acquire the knowledge and skills that are essential for the promotion of health and prevention of disease in culturally diverse populations. The curriculum examines the factors that influence health. The concentration can improve the quality of life around you. Learn to plan education strategies and evaluate their effectiveness. Promote healthier lifestyles in culturally diverse populations around the world.

REQUIRED CORE COURSES - (16 units)

EPID 573A	Basic Principles of Epidemiology (3)
PHPM 574	Public Health Policy & Management (3)
EHS 575	Environmental & Occupational Health (3)
BIOS 576A	Biostatistics in Public Health (3)
HPS 577	Sociocultural & Behavioral Aspects of Public Health (3)
HPS 580	Integrated Public Health Learning Experience - MPH capstone course (1)
Master's Report Preparation Workshop (required ; non-credit; semester before internship begins)	
Interprofessional Education Activities (documentation required ; non-credit)	

REQUIRED COURSES - (26 units)

HPS 531	Contemporary Health Issues & Research (3)
HPS 532P	Planning of Public Health Programs (3)
HPS 532E	Evaluation of Public Health Programs (3)
HPS 535	Multicultural Health Benefits (3)
PHPM 569	Fundamentals of Health Budgeting & Financial Management (3)
HPS 628	Public Health Research & Evaluation (3)
HPS 642	Public Health Communications (3)
HPS 909	Master's Report (5)

Total Required Credit Hours: 42

MPH – Global Health (Online Campus) Curriculum

Effective for those following the 2025/2026 academic curriculum guide

The Global Health concentration provides students with a curriculum that addresses the history and current status of the socioeconomic, cultural, political and physiological issues that affect health in a global setting. Course work in Global Health emphasizes core public health skills, qualitative and quantitative research methods, proposal development, monitoring and evaluation, history of global response to health issues, and an in-depth understanding of determinants of health.

REQUIRED CORE COURSES - (19 units)

HPS 533	Global Health (3)
BIOS 576A	Biostatistics in Public Health (3)
HPS 577	Sociocultural and Behavioral Aspects of Public Health (3)
EHS 575	Environmental and Occupational Health (3)
EPID 573A	Basic Principles of Epidemiology (3)
PHPM 574	Public Health Policy and Management (3)
HPS 580	Integrated Public Health Learning Experience- MPH Capstone Course (1)
Master's Report Preparation Workshop (required; non-credit; semester before internship begins)	
Interprofessional Education Activities (documentation required; non-credit)	

REQUIRED COURSES - (23 units)

EHS 525	A Public Health Lens to Climate Change (3)
HPS 529	Project Design and Evaluation in Global Health (3)
HPS 560	International Nutrition (3)
PHPM 569	Fundamentals of Health Budgeting and Financial Management (3)
HPS 577	Global Maternal Health: Cultural Perceptions and Policy Approaches (3)
HPS 635 OR	Applied Field Methods in Global Health Nutrition (3)
HPS 559	Management of Global Public Health Emergencies (3)
HPS 909	Master's Report (5)

Total Required Credit Hours: 42

MD/MPH

(Main and Phoenix Campuses)

This program is designed to train future leaders in Public Health and clinical medicine and to prepare future clinicians for community-engaged, evidence-based, and socially responsible medical practice. These goals are achieved in an interprofessional setting that emphasizes respect for people of all ages, genders, ethnicities, cultures, and national origins. Students' pursuit of knowledge and preparation for leadership will be guided by academic and clinical mentors who foster inquisitiveness, open-mindedness, compassion, and resilience. The dual degree programs provide medical students with additional training in all the core public health competencies. The curricula are intended to enhance the graduate's ability to provide high quality medical care by using public health knowledge and skills to plan, implement, and evaluate policies that affect the health of communities. These skills complement the pathophysiologic, diagnostic, and therapeutic training needed to treat individual patients, provided by the Colleges of Medicine.

MD/MPH – Main and Phoenix Campuses

Dual Degree with Clinical Leadership

The MD/MPH Clinical Leadership Degree comprises 42 units of coursework and experiential learning that leads to a Master's of Public Health in Clinical Leadership. The MPH requirements are summarized below:

Effective for those following the 2025/2026 academic curriculum guide

MPH Clinical Leadership

MINIMUM CREDIT REQUIREMENTS – (42 units)

EPID 573A	Basic Principles of Epidemiology (3)
PHPM 574	Public Health Policy & Management (3)
EHS 575	Environmental & Occupational Health (3)
BIOS 576A	Biostatistics in Public Health (3)
HPS 577	Sociocultural & Behavioral Aspects of Public Health (3)
PHPM 580	Integrated Public Health Learning Experience - MPH capstone course (1)
PHPM 570	Issues and Trends in Public Health (3)
PHP 572	Applied Public Health Practice (3)
PHPM 696I	Clinical Leadership and Administration (4)
PHPM 909	Master's Report (5)
Electives (11) - MEDP 802 (2) and (9) Chosen in consultation with your faculty mentor	

Master's Report Preparation Workshop (**required**; non-credit)

Interprofessional Education Activities (**documentation required**; non-credit)

Total Required Credit Hours: 42

to complete the MPH degree in the Clinical Leadership concentration

(in addition to the medical school curriculum)

MPH/MA Latin American Studies

The MPH/MA Dual Degree Program allows students to earn a Master of Public Health and a Master of Arts degree in Latin American Studies (LAS). This dual degree program offers students the opportunity for interdisciplinary study allowing them to customize their dual degree by selecting one of 10 MPH concentration areas and by taking electives addressing issues relevant to Latin American populations. All MPH concentration areas have a minimum of 42 units (with the exception of the EOH – Industrial Hygiene track, which requires a minimum of 45 units). A minimum of 50% of credit hours must be unique to each degree and cannot be used for dual credit, and a maximum of 15 units may be shared between the MPH and LAS degrees. Students work with academic advisors in both programs to determine their specific course requirements.

MPH/MA – Latin American Studies

Effective for those following the 2025/2026 academic curriculum guide

Latin American Studies (LAS) MA Requirements - (36+ graduate units)

LAS 500 Introduction to Latin American Studies (3)

LAS 550 Research Methods Course (required for students completing thesis)

or Interdisciplinary Seminar Course approved by LAS advisor (3)

- Courses from primary discipline or thematic area (identified by student with LAS advisor approval) for a total of 15 units.
- International public health courses with assignments focusing on Latin America or U.S. – Mexico border (9 units)
- Thesis or Public Health/LAS Internship – 6 units to be completed through: 6 unit thesis or 3 – 6 units Public Health/LAS Master’s Report “Internship” and/or approved elective course work. (6 units)
- Language requirement met by Spanish 330 and Portuguese 305 or Spanish 251 and Portuguese 325 or equivalency exam.

Please note: Language credits do not count toward the 36 total unit requirement for LAS.

Master in Public Health Requirements - (minimum of 42 units)

CORE COURSES - (16 units)

EPID 573A Basic Principles of Epidemiology (3)

PHPM 574 Public Health Policy & Management (3)

EHS 575 Environmental & Occupational Health (3)

BIOS 576A Biostatistics in Public Health (3)

HPS 577 Sociocultural & Behavioral Aspects of Public Health (3)

* 580 Integrated Public Health Learning Experience - **MPH capstone course** (1)

PHPM 909 Master’s Report (3-6 units) **

Master’s Report Preparation Workshop (**required**; non-credit; semester before internship begins)

Interprofessional Education Activities (**documentation required**; non-credit)

REQUIRED CONCENTRATION COURSES - (11 - 23 units) **

The list of required courses can be found in this curriculum guide listed under each of the MPH disciplines. These requirements may change from year to year and are specific to the year of acceptance into the MPH program.

ELECTIVES - (3-12 units, approved by Faculty Mentor) **

* 909 Master’s Report units and the 580 Integrated Public Health Learning Experience course unit can be taken from programs within the College of Public Health with course prefixes of HPS, EHS, EPID, BIOS, PHP, or PHPM.

** The number of units and prerequisite courses varies based on the MPH concentration. A maximum of 15 units may be shared between the MPH and LAS degrees.

MPH/MS Mexican American Studies

The MPH/MS Dual Degree Program allows students to earn a Master of Public Health and a Master of Science degree in Mexican American Studies. Students gain an advanced understanding of the Mexican American and Latino populations in the United States that prepares them to develop culturally-competent public health programs and policies targeting Latinos. This program provides subject and research competency on Mexican Americans as well as applied skills for working professionals and graduate students interested in better serving the Mexican American population of the Southwest. This dual degree program offers students the opportunity for interdisciplinary study allowing them to customize their dual degree by selecting one of 10 MPH concentration areas and by taking electives addressing issues relevant to Mexican American and Latino populations. The minimum number of required units varies based on the MPH concentration. A minimum of 50% of credit hours must be unique to each degree and cannot be used for dual credit. Students work with academic advisors in both programs to determine their specific course requirements.

MPH/MS – Mexican American Studies

Effective for those following the 2025/2026 academic curriculum guide

Mexican American Studies MS Requirements - (33 units)

Thirty-three (33) units are required for the MS in Mexican American Studies: a minimum of 21 core units, 6 elective units from the Latino Health and Wellness Strand, and the choice of a 6-unit thesis or 6 units of electives and an oral examination.

CORE COURSES - (21 units)

MAS 508	The Mexican American: A Cultural Perspective (3) (Fall)
MAS 509	Mexican Immigration (3) (Spring)
MAS 525	Latino Health Disparities (3) (Fall)
MAS 566	Decolonial Chicana Theory (3) (Fall)
MAS 580A	Advanced Research Methods on Latinos (3) (Spring)
MAS 535	Mexican Traditional Medicine (3) <u>or</u> MAS 505 Traditional Indian Medicine (3)

MAS Course based on student's specialization (3)

ELECTIVE COURSES - (minimum 6 units, approved by Faculty Advisor)

THESIS OR EXAMINATION OPTION - (6 units)

Master in Public Health Requirements - (minimum of 42 units)

CORE COURSES - (16 units)

EPID 573A	Basic Principles of Epidemiology (3)
PHPM 574	Public Health Policy & Management (3)
EHS 575	Environmental & Occupational Health (3)
BIOS 576A	Biostatistics in Public Health (3)
HPS 577	Sociocultural & Behavioral Aspects of Public Health (3)
* 580	Integrated Public Health Learning Experience - MPH capstone course (1)

Master's Report Preparation Workshop (**required**; non-credit; semester before project begins)

Interprofessional Education Activities (**documentation required**; non-credit)

909 Master's Report (3-6 units) *

REQUIRED CONCENTRATION COURSES - (11 - 23 units) **

The list of required courses can be found in this curriculum guide listed under each of the MPH disciplines. These requirements may change from year to year and are specific to the year of acceptance into the MPH program.

ELECTIVES - (3-12 units, approved by Faculty Mentor) **

* 909 Master's Report units and the 580 Integrated Public Health Learning Experience course unit can be taken from programs within the College of Public Health with course prefixes of HPS, EHS, EPID, BIOS, PHP, or PHPM.

** The number of units and prerequisite courses varies based on the MPH concentration. A minimum of 50% of credit hours must be unique to each degree and cannot be used for dual credit.

JD/MPH Law

The JD/MPH Dual Degree Program is offered jointly by the University of Arizona College of Law and the Mel and Enid Zuckerman College of Public Health. The dual degree program allows a student to earn a Juris Doctor degree (JD) and a Master of Public Health (MPH). The objective of the program is to support and encourage individuals with an interest in public health studies in the development of interdisciplinary knowledge and skills in preparation for a career in health law, public health policy, or a related field. The Law and Public Health (JD/MPH) dual degree is designed to train leaders in the field of public health law.

This dual degree program offers students the opportunity for interdisciplinary study allowing them to customize their dual degree by selecting one of **10 MPH concentration areas** and by taking electives addressing issues relevant to public health law. Graduates are prepared for positions in a variety of settings, including work in a health law or environmental section of a law firm, positions in local, state, and federal government, research or advocacy jobs in nongovernmental organizations, or posts in academia.

Students in the program fulfill all requirements necessary to earn a JD from the College of Law and an MPH from MEZCOPH and complete the separate requirements for the JD and MPH degrees in four years (the program is open only to full-time students). The preferred sequence of courses for dual degree students is to be full time in the College of Law for the first year, then complete the first year of the Master of Public Health program during the second year, or vice-versa, before taking courses from both programs simultaneously. Following completion of the first year of study of each program, a student may take both Law and Master of Public Health courses simultaneously, to complete both degrees. Students will work with their advisors to determine how they can coordinate their class schedules to meet both degree requirements. This will vary by the student's concentration area of study.

JD/MPH – Law

Effective for those following the 2025/2026 academic curriculum guide

Juris Doctor (J.D.) Requirements

The College of Law offers an interdisciplinary Juris Doctor degree. Students may apply up to 15 units of MPH credit to the JD degree and must earn a total of 112 units combined between the programs. Students work with an advisor in the College of Law to determine their specific course requirements. The JD/MPH is typically a four-year program.

Master in Public Health Requirements - (minimum of 42 units)

The Mel and Enid Zuckerman College of Public Health offers an interdisciplinary Master's program in Public Health. Students need a minimum of 42 units, in order to complete the MPH degree (in addition to the law school curriculum).

CORE COURSES - (16 units)

EPID 573A Basic Principles of Epidemiology (3)

PHPM 574 Public Health Policy & Management (3)

EHS 575 Environmental & Occupational Health (3)

BIOS 576A Biostatistics in Public Health (3)

HPS 577 Sociocultural & Behavioral Aspects of Public Health (3)

* 580 Integrated Public Health Learning Experience - **MPH capstone course** (1)

Master's Report Preparation Workshop (required; non-credit; semester before project begins)

Interprofessional Education Activities (**documentation required**; non-credit)

909 Master's Report (3-6 units) *

REQUIRED CONCENTRATION COURSES - (11 - 23 units) **

The list of required courses can be found in this curriculum guide listed under each of the MPH disciplines. These requirements may change from year to year and are specific to the year of acceptance into the MPH program.

ELECTIVES - (3-12 units, approved by Faculty Mentor) **

* 909 Master's Report units and the 580 Integrated Public Health Learning Experience course unit can be taken from programs within the College of Public Health with course prefixes of HPS, EHS, EPID, BIOS, PHP, or PHPM.

** The number of units and prerequisite courses varies based on the MPH concentration. A minimum of 50% of credit hours must be unique to each degree and cannot be used for dual credit. Tuition and Fees: Tuition and fees vary by program. Please contact both programs to better governed by University Policy found at <https://grad.arizona.edu/funding/costs>.

MPH/MBA Business Administration

The MPH/MBA Dual Degree Program is offered in partnership by the University of Arizona Mel and Enid Zuckerman College of Public Health and the Eller College of Management. The MPH/MBA dual degree program allows students to earn a Master of Public Health (MPH) and a Master of Business Administration (MBA) degree aimed to provide leadership and management training for the health services industry at the local, national and international levels.

This dual degree program offers students the opportunity for interdisciplinary study by allowing them to customize their dual degree by selecting one of **10 MPH concentration areas** which offer comprehensive knowledge and competencies in the public health sciences (health behavior and health promotion, family and child health, public health policy and management, health services administration, biostatistics, epidemiology, environmental health sciences) and state-of-the-art business practices (finance, accounting and marketing combined with strategic thinking, entrepreneurship and value- based management). The program prepares graduates to transfer strategic thinking, scientific know-how and leadership and managerial skills to rapidly changing environments and global health challenges in the 21st century. Graduates are prepared for work in health industry leadership positions, including health care marketing, healthcare consulting, hospital administration, managed care, biotechnology, healthcare related non-profit work or positions in academia.

Students in the MPH/MBA dual degree program complete the separate requirements for the MPH and MBA degrees in three years upon the completion of a minimum of 75-79 units in Public Health and Business Administration (the program is open only to full-time students). The preferred sequence of courses is for dual degree students to start full time in the Eller College of Management for the first year, then complete the first year of the Master of Public Health program during the second year of studies, then courses from both programs simultaneously in the third year. Following completion of the first year of study of each program, a student may take both MPH and MBA courses simultaneously, to complete both degrees. Students will work with their advisors to determine how they can coordinate their class schedules to meet both degree requirements. This will vary by the student's concentration area of study within the MPH Program. The concentrations most easily coordinated with the MBA are Public Health Policy and Management, Health Behavior Health Promotion, and Biostatistics. Although, all MPH and most MBA concentrations are possible.

MPH/MBA – Business Administration

Effective for those following the 2025/2026 academic curriculum guide

Master of Business Administration (MBA) Requirements

The Eller College of Management offers a Master of Business Administration degree. Admitted students will need a minimum of 48 graduate units to successfully complete the MBA degree program. Students must be enrolled for full academic year as an MBA student.

CORE COURSES - (32 units)

Students will take courses in Accounting, Economics, Finance, Management, Marketing, Management Information Systems, as well as Business Communication, complete an MBA consulting project, and participate in a Global Business Experience to an emerging or developing economy.

ELECTIVES - (16 units)

Course selection to be completed in coordination with the MBA academic advisor.

Master in Public Health Requirements - (minimum of 42 units)

The Mel and Enid Zuckerman College of Public Health offers an interdisciplinary Master's program in Public Health. Students need a minimum of 42 units, in order to complete the MPH degree (in addition to the required MBA curriculum).

CORE COURSES - (16 units)

EPID 573A	Basic Principles of Epidemiology (3)
PHPM 574	Public Health Policy & Management (3)
EHS 575	Environmental & Occupational Health (3)
BIOS 576A	Biostatistics in Public Health (3)
HPS 577	Sociocultural & Behavioral Aspects of Public Health (3)
* 580	Integrated Public Health Learning Experience - MPH capstone course (1)

Master's Report Preparation Workshop (**required**; non-credit; semester before project begins)

Interprofessional Education Activities (**documentation required**; non-credit)

*909 Master's Report (3-6 units) **

REQUIRED CONCENTRATION COURSES - (11 - 23 units)

** The list of required courses can be found in this curriculum guide, and also on the MPH [website](#), listed under each of the MPH disciplines. These requirements may change from year to year and are specific to the year of acceptance into the MPH program.

ELECTIVES - (3-12 units, approved by Faculty Mentor) **

* 909 Master's Report units and the 580 Integrated Public Health Learning Experience course unit can be taken from programs within the College of Public Health with course prefixes of HPS, EHS, EPID, BIOS, PHP, or PHPM.

** The number of units and prerequisite courses varies based on the MPH concentration. A minimum of 50% of credit hours must be unique to each degree and cannot be used for dual credit. In summary, a student enrolled in the dual degree program may count 14-21 units depending on the concentration, toward both degrees.

Tuition and Fees: Tuition and fees vary by program. Please contact both programs to better understand what your annual tuition and fees will be for each academic year. Charges are governed by the UA Policy: <https://grad.arizona.edu/funding/costs/differential-tuition-dual-degrees>

PharmD/MPH Pharmacy

The Doctor of Pharmacy/Master of Public Health (PharmD/MPH) is offered jointly by the University of Arizona College of Pharmacy and the Mel and Enid Zuckerman College of Public Health. The dual degree program allows students to simultaneously earn a Doctor of Pharmacy (PharmD) and a Master of Public Health (MPH). This PharmD/MPH combines the complementary strengths of the College of Pharmacy and the Zuckerman College of Public Health to provide students with an integrated curriculum focusing on knowledge and ingenuity in the delivery of pharmaceutical care within the broader population based public health environment.

Dual Degree Requirements:

PharmD/MPH dual degree applicants must meet the application deadlines, testing requirements, and submit program fees to each program independently. Dual degrees refer to a formal, approved program for a student to earn two degrees simultaneously. Dual degrees allow flexibility and encourage interdisciplinary work. Since both degrees already exist, the approval process is minimal. The minimum requirements for dual degrees are:

1. Students must apply to and be accepted into both programs individually and separately.
2. Students must meet all the requirements for both degrees, and
3. Students must be enrolled for a minimum of two semesters as an MPH student.

Students enrolled in the dual degree program complete the separate requirements as an integrated curriculum taking courses for the PharmD and MPH degrees during the same semesters. This can allow students to complete both degrees within 5 years of study (at least one year sooner than pursuing the degrees separately), if they are full-time students. In order to facilitate a streamlined combined program there will be acceptance of up to 21-22 units toward both degrees (contact the MPH and PharmD Advisors for information about these course units). Students will have to work with their advisors to determine how they can coordinate their class schedules to meet both degree requirements. This will vary by the student's MPH concentration area of study within the MPH Program.

This dual degree program consists of the PharmD curriculum and any one of the MPH concentration areas. The concentration areas most easily coordinated include:

- Biostatistics
- Epidemiology
- Health Behavior and Promotion
- Public Health Policy and Management

The Master of Public Health (MPH) also has concentration areas in Environmental and Occupational Health; Family and Child Health; Health Services Administration; One Health and Public Health Practice. Students may consider these concentrations; however, the coordination with the PharmD may be more difficult.

Depending on the student's choice of concentration within the MPH, the dual degree program could lead to a wide variety of career options. PharmD/MPH degree graduates may assume leadership roles in practice, health policy, governmental and non-governmental agencies, and research and academic institutions. Students will be provided with the expertise and competencies essential to provide care and services, in order to promote the health and wellbeing of local and global communities.

PharmD/MPH- Pharmacy

Effective for those following the 2025/2026 academic curriculum guide

Doctor of Pharmacy Requirements

The College of Pharmacy requires eight units of professional electives (non-practicum) and 15 units of practicum electives for the PharmD program. Total units for the PharmD Program is 142 units.

Master in Public Health Requirements - *(minimum of 42 units)*

The Mel and Enid Zuckerman College of Public Health offers an interdisciplinary Master's program in Public Health. Students need a minimum of 42 units, in order to complete the MPH degree (in addition to the required PharmD curriculum).

CORE COURSES - *(16 units)*

EPID 573A Basic Principles of Epidemiology (3)

PHPM 574 Public Health Policy & Management (3)

EHS 575 Environmental & Occupational Health (3)

BIOS 576A Biostatistics in Public Health (3)

HPS 577 Sociocultural & Behavioral Aspects of Public Health (3)

* 580 Integrated Public Health Learning Experience - **MPH capstone course** (1)

Master's Report Preparation Workshop (**required**; non-credit; semester before project begins)

Interprofessional Education Activities (**documentation required**; non-credit)

*909 Master's Report (3-6 units) *

(up to 6 units; the number of units and prerequisite courses varies based on the MPH concentration). Four units of Pharmacy Practice Project can count toward 6 units of 909. Students are required to present projects at MEZCOPH and during the College of Pharmacy poster day.

REQUIRED CONCENTRATION COURSES - *(18 - 27 units)*

Each MEZCOPH concentration has an additional group of required courses and electives to make up the minimum required MPH units noted above (between 18 and 27 units). See the MEZCOPH Academic Curriculum Guide, for these MPH courses listed under each concentration area.

* 909 Master's Report units and the 580 Integrated Public Health Learning Experience course unit can be taken from programs within the College of Public Health with course prefixes of HPS, EHS, EPID, BIOS, PHP, or PHPM.

** The number of units and prerequisite courses varies based on the MPH concentration. A minimum of 50% of credit hours must be unique to each degree and cannot be used for dual credit.

Tuition and Fees: Tuition and fees vary by program. Please contact both programs to better understand what your annual tuition and fees will be for each academic year. Charges are governed by the UA Policy: <https://grad.arizona.edu/funding/costs/differential-tuition-dual-degrees>

Master of Science in Biostatistics and Health Data Science

Paul Hsu, PhD - Program Director

The Master of Science in Biostatistics and Health Data Science is offered by the [Department of Epidemiology and Biostatistics](#). The educational objective is to prepare individuals to work effectively as applied biostatisticians/data scientists in a variety of public health, epidemiological and clinical research settings. The MS in Biostatistics and Health Data Science program level competencies on the [program website](#) define professional skills that students are expected to acquire upon graduating from the program.

The difference between the MS and MPH concentration in Biostatistics and Health Data Science is that the MS provides training in probability and statistical theory with a research focus, while the MPH provides a broader background in public health.

A competitive applicant will have a strong quantitative background; at least three semesters of college-level calculus through multivariable/vector calculus is required; in addition, one semester of linear algebra is strongly recommended.

MS – Biostatistics and Health Data Science Curriculum

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED CORE COURSES - (12 units)

EPID 573A	Basic Principles of Epidemiology (3)
BIOS 576A	Biostatistics in Public Health (3)
BIOS 576B	Biostatistics for Research (3)
BIOS 576C	Applied Biostatistics Analysis (3)
BIOS 585	Public Health Fundamentals for Researchers (3)*

* (For students who have met the core competencies in BIOS 585 through prior courses, for example, as would be expected in a prior degree, minor or certificate in public health, an elective may be taken in lieu of this course).

BIOSTATISTICS EMPHASIS

REQUIRED COURSES - (9 units)

BIOS 688A	Statistical Consulting (1)
BIOS 688B	Statistical Consulting Practicum (2)
MATH 564	Theory of Probability (3)
MATH 566	Theory of Statistics (3)

ELECTIVE COURSES - (6 units)

Choose from:

BIOS 511	Healthcare Data Science (3)
BIOS 576D	Data Management and the SAS Programming Language (3)
STAT 675	Statistical Computing (3)
BIOS 500 and 600 level courses not listed above	

HEALTH DATA SCIENCE EMPHASIS

REQUIRED COURSES - (12 units)

BIOS 511	Healthcare Data Science (3)
BIOS 550	Health Data Acquisition and Assessment (3)
BIOS 551	Health Data Management and Visualization (3)
BIOS 552	Health Data Analysis and Communication Methods (3)

ELECTIVE COURSES - (6 units)

Choose from:

- BIOS 648 High Dimensional Health Data Analysis and Machine Learning (3)
- MATH 574M Machine Learning (3)
- INFO 521 Introduction to Machine Learning (3)
- EPID 573A Basic Principles of Epidemiology (3)
- EPID 526 Digital Epidemiology (3)
- BIOS 500 and 600 level courses not listed above

CULMINATING EXPERIENCE FOR BOTH EMPHASES- (At least 3 units)

Choose from:

- BIOS 699 Independent Study (3)
- BIOS 900 Research (3)
- BIOS 910 Thesis (6)

Total Required Credit Hours: 33

OTHER REQUIREMENTS:

Professional Communication Component: Oral presentation of MS thesis or project.

Professional Portfolio: Must include a resume, at least 2 data analysis reports, copy of thesis or MS project report, documentation of computing proficiency, pdf/PowerPoint of oral presentation. Student's portfolio is to be approved by academic advisor.

Master of Science in Environmental Health Sciences

Yevheniia Varyvoda, PhD - Program Director

The Master of Science in Environmental Health Sciences is offered by the [Department of Community, Environment and Policy](#). Using an interdisciplinary approach, Environmental Health Sciences provides the critical link between environmental and occupational exposures and human health.

The degree prepares individuals to evaluate and control health risks posed by chemical and biological contaminants and physical exposures (noise, heat and radiation) in occupational environments and communities. Students will receive advanced systematic training in epidemiological and community-based research methods, statistical analysis, exposure assessment, environmental modeling, toxicology, and intervention design.

Graduates of this program will apply theory and methods to public health research, evaluation, analysis and decision-making. The program promotes approaches for assessing, preventing and controlling environmental hazards to human health.

The Master of Science degree is designed for individuals who seek training in environmental health research. It is anticipated that graduates will occupy positions as project leaders, program directors and research personnel in academic, government, corporate, community and industrial settings.

For the MS, at least 42 credits are required for the major (including a minimum of 12 units of electives and a minimum of 6 units of thesis). The overall course of study will be developed by the student and the faculty advisor and approved by the student's Graduate Committee and Director of the Environmental Health Sciences Program. The MS degree program requires approximately two to three years for completion including development and defense of a research thesis. The MS in Environmental Health Sciences program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program.

Successful MS students in our program may be admitted directly to the PhD program pending a favorable vote by the primary EHS faculty and completion of their MS degree.

MS – Environmental Health Sciences Curriculum

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED MAJOR COURSES - (24 units)

EPID 573A	Basic Principles of Epidemiology (3)
BIOS 576A	Biostatistics in Public Health (3)
BIOS 576B	Biostatistics for Research (3)
EHS 584	Fundamentals of Industrial and Environmental Health (3)
EHS 585	Public Health Fundamentals for Researchers (3)*
EHS 502	Environmental Monitoring and Analysis (3)
EHS 653	Applied Exposure Assessment (3)
EHS 696R	Environmental Health Seminar (1 unit each semester – 3 times)

* (For students who have met the core competencies in EHS 585 through prior courses, for example, as would be expected in a prior degree, minor or certificate in public health, an elective may be taken in lieu of this course).

ELECTIVE COURSES

Minimum of 12 elective units required for the MS (approved by faculty advisor). Students select courses in areas of emphasis: Exposure and Risk Assessment, Climate and Health, Environmental Contaminant Modeling or Occupational Health and Safety.

REQUIRED MASTER'S THESIS - EHS 910 (6 units)

Total Required Credit Hours: 42

Master of Science in Epidemiology

Heidi Brown, PhD, MPH - Program Director

The Master of Science in Epidemiology is offered by the [Department of Epidemiology and Biostatistics](#). The Master of Science degree in Epidemiology is designed for individuals who wish to pursue training in epidemiological research. It is anticipated that graduates will occupy positions as research administrators, program managers, analysts, and evaluators in universities, health departments, governmental agencies, and similar organizations. Students have the option of one of four tracks or a general MS degree in Epidemiology. The requirements for these vary slightly.

The overall course of study for the MS degree will be developed by the student and the advisor and approved by the student's Graduate Committee and the Epidemiology Program Director. On average, the MS program requires two years for completion. The first year is usually devoted to core coursework. The second year is focused on remaining coursework and development of the master's thesis research. Consult the UA catalog for further details on the current course schedule and specific course requirements.

The MS in Epidemiology program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program.

MS – Epidemiology Curriculum

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED MAJOR COURSES - (23 units)

EPID 573A	Basic Principles of Epidemiology (3)
EPID 573B	Epidemiologic Methods (3)
EPID 573C	Advanced Epidemiology (3)
BIOS 576A	Biostatistics for Public Health (3)
BIOS 576B	Biostatistics for Research (3)
EPID 585	Public Health Fundamentals for Researchers (3) *
EPID 696A	Epidemiology Seminar (1 unit - 2 times), (or equivalent approved by Faculty Advisor)**
BIOS XXX	Biostatistics course beyond BIOS 576B (3)

* For students who have met the core competencies in EPID 585 through prior courses, for example, as would be expected in a prior degree, minor or certificate in public health, an elective may be taken in lieu of this course.

REQUIRED MASTER'S THESIS - EPID 910 (4 units)

EPIDEMIOLOGY TRACK – (9 units)

Students will select one area of specialization that aligns with their research program. Select a 9-unit track from the following options:

Clinical Research – Select 9 units from the following:

EPID 670	Chronic Disease Epidemiology (3-4)
EPID 677	Principles of Genetic Association Studies (3)
BIOS 511	Healthcare Data Science (3)
BIOS 680	Biostatistical Methods I: Clinical Trials/Survival Analysis (3)
CTS 501	Principles of Clinical Research I (4)
CTS 502	Principles of Clinical Research II (4)

** 1 unit of Epidemiology Seminar must be EPID 696T – Clinical and Translational Research Seminar

Infectious Diseases – Select 9 units from the following:

EPID 660	Infectious Disease Epidemiology (3)
EPID 679	One Health Applications and Practice (3)
EPID 596D	Public Health Experience - Student Epidemiology Response Team (2)
ACBS 519	General Immunological Concepts (4)
ACBS 549	Diseases of Wildlife (3)
ECOL 557	Medical-Veterinary Entomology (3)

Field Methods – Select 9 units from the following:

EPID 526	Digital Epidemiology (3)
EPID 646	Measurement Issues in Epidemiology (3)
EPID 673	Mixed Research Methods - Design, Conduct and Application in Health Research (3)
EPID 676	Spatial Epidemiology (3)
EPID 596D	Public Health Experience - Student Epidemiology Response Team (2)

Lifecourse / Chronic Epidemiology – Select 9 units from the following:

EPID 677	Principles of Genetic Association Studies (3)
EPID 615	Cancer Epidemiology and Prevention (3)
EPID 630	Maternal and Child Health Epidemiology (3)
EPID 670	Chronic Disease Epidemiology (3-4)

All tracks allow for a single 3-unit independent study (EPID 599, EPID 699). Students may also take a generalist approach and select 9 units from the above courses with approval from their Faculty Advisor.

Total Required Credit Hours: 36

Doctoral Programs

The UA Zuckerman College of Public Health is committed to offering professional and academic doctoral degree programs designed to prepare individuals for rewarding careers in public health at the local, national and international level. These programs are adept at integrating academic learning with public health practice to ensure a diverse and well-rounded educational experience.

Doctorate in Public Health (DrPH):

The DrPH is an advanced, professional degree program designed for the student who has a Master of Public Health (MPH) degree or its equivalent and who intends to pursue a leadership career as a public health professional. The DrPH program focuses on developing future leaders in public health practice who will advance the public's health through the integration and application of a broad range of knowledge and analytical skills in leadership, practice, policy analysis, research, program management and professional communication. The DrPH program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program.

The DrPH program prepares individuals to translate scientific knowledge into community-based programs that improve the health status of communities, identify solutions to community health problems, and provide leadership in public health policy and management within both academic and nonacademic settings, as well as in public-agency or private-sector settings that emphasize improving the health of the public. It follows that public health workers from the state and region with the requisite experience and subsequent training will be best suited and prepared for creating the administrative infrastructure necessary for promotion of a healthy public and amelioration of current public health issues in the region.

There are two key examinations associated with the DrPH program that indicate a student's progress toward obtaining the degree. The DrPH program requires students to complete a written and oral comprehensive doctoral examinations and a dissertation defense.

DrPH Options:

There are two areas of study available to DrPH students. Students are required to select either **Maternal and Child Health** or **Public Health Policy and Management**. A description of each area is included on the following pages.

DrPH Course Requirements:

The DrPH course requirements are determined by the DrPH concentration that offers the DrPH area of study. The specific course requirements for each area are listed on the following pages.

Prerequisites:

Students should be aware that some of the coursework for the DrPH have pre-requisites; therefore, students work with their Faculty Advisor to plan their coursework accordingly. In addition, students without an MPH degree will be required to complete the five core MPH courses.

Doctorate in Public Health in Maternal and Child Health

Christina Cutshaw, PhD - Program Director

The DrPH in Maternal and Child Health is a degree offered by the [Department of Health Promotion Sciences](#). The DrPH program focus is on the population-based study of health and health care among the maternal and child health population, including families, infants, children, adolescents, and people of child-bearing age. The DrPH program prepares students to translate scientific knowledge into community-based programs that improve the health status of communities, to identify solutions to community health problems, and to provide leadership in public health policy and management in a variety of settings. The program prepares students for administrative leadership, research and teaching positions at local, state, tribal, federal, or global levels. Graduates hold positions as program directors, faculty, MCH program developers, policy analysts, and researchers.

The doctoral program typically requires four to five years for completion. The first two to three years involve coursework, the written and oral comprehensive examination, and the development of a doctoral proposal. The student determines the doctoral proposal in consultation with the student's Dissertation Committee. Doctoral students defend their dissertation through a public presentation and closed oral examination with their Dissertation Committee.

DrPH Admissions Criteria:

The program is designed for students who have been awarded a Master's degree, preferably a Master of Public Health degree, and who have at least two years of public health work experience.

Students entering without a prior MPH degree will be required to complete the five core MPH courses offered through MEZCOPH, or their equivalent, in addition to the minimum DrPH credit hours of course work in the major.

DrPH – Maternal and Child Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED COURSES

Of the 55 credit hours in the major, 14 are courses required of all students earning a DrPH within the College; 16 are specific to the Maternal and Child Health concentration; 7 units are from electives or selectives approved by the major advisor; and 18 units are dissertation hours. All students designate a minor area of study that include a minimum of 9 units. ***Students entering without a prior MPH degree will be required to complete the five core MPH courses offered through MEZCOPH, or their equivalent, in addition to the minimum DrPH credit hours of course work in the major.*** The DrPH in Maternal and Child Health program level competencies on the [program website](#), define professional skills that students are expected to acquire while in the program.

DRPH REQUIRED COURSES - (14 units)

PHPM 569	Fundamentals of Health Budgeting and Financial Management (3)
PHPM 608A	Public Health Law and Ethics (3)
HPS 609	Evaluating the Public Health Literature (1 unit; 2 times)+
HPS 544	Fundamentals of Evaluation (3) or alternate (3) (approved by Faculty Advisor)
HPS 704	Doctoral Public Health Leadership for Health Equity (3)

+ HPS 609 is a 1 unit course that must be taken twice, preferably during the first year in residence. Must take both topics: Research Perspectives in Public Health and Research to Practice

DRPH MATERNAL AND CHILD HEALTH REQUIRED COURSES - (16 units)

Students who have not taken HPS 586 Maternal and Child Health or its equivalent are required to take the course as a prerequisite and it may be used to fulfill elective requirements.

HPS 565	Public Health Advocacy (3)
HPS 682	Women and Children Health Policy (3)
HPS 620A	Advanced Research Methods in Health Promotion I (Fall) (3) *
HPS 618	Introduction to Systematic Reviews (3) OR EPID 673 Mixed Research Methods- Design, Conduct, and Application in Health Research (3) OR HPS 607 Qualitative Research Methods in Public Health (3)
HPS 605	Community Based Participatory Action Research to Decrease Health Disparities (3)

HPS 597	Service Learning Course (1), choose from the following:
HPS 597A	Maternal & Child Health Programs in Urban Settings (1) – <i>(offered Spring - Tucson)</i>
HPS 597B	Maternal & Child Health Programs in the Rural Southwest (1) – <i>(offered Summer - location varies)</i>
HPS 597E	Public Health for Community Wellness (2) – <i>(offered Fall and Spring)</i>
PHP 597C	Border Health Service Learning Institute (1) – <i>(offered Summer - US/ Mexico Border)</i>
PHP 597F	Phoenix Urban Service Learning (1) – <i>(offered Winter - Phoenix)</i>
PHPM 597D	Rural Health Service Learning Institute (1)– <i>(offered Spring- location varies)</i>
EPID 597S	Skin Cancer Prevention in the Community Setting (1-2) – <i>(offered Fall and Spring)</i>

CONCENTRATION ELECTIVES – *(minimum 7 units, approved by Faculty Advisor)*

MINOR - *(minimum 9 units)*

The minor area of study can be in other academic doctoral programs in Public Health, or in other doctoral programs throughout the university.

DISSERTATION - *(minimum 18 units)*

The dissertation experience provides students a mentored opportunity to analyze an important public health problem by applying state-of-the-art theoretical and applied practices.

Total Required Credit Hours: 64

Doctorate in Public Health in Public Health Policy & Management

Bryna Koch, DrPH - Interim Program Director

The DrPH program in Public Health Policy and Management (PHPM) is offered by the [Public Health Practice, Policy and Translational Research Department](#). This degree program is designed to further develop the knowledge and skills of public health practitioners who are currently working in the public or private sector. Areas of emphasis include analyzing public health problems, managing the public health workforce, crafting evidence-based recommendations and translating those recommendations into public policy. Because of the program's unique setting and activities, graduates will be prepared to work collaboratively with a broad range of organizations that serve the diverse communities and populations residing in the Southwest.

The doctoral program typically requires four to five years to complete. The first two to three are devoted to coursework and the last 2-3 to completing an area of applied research. While certain courses are required, each student's course of study is tailored to meet their specific goals and interests within the bounds established by the student's Graduate Committee.

All students are required to defend their area of research via a public presentation of their findings followed by an oral examination with their Dissertation Committee.

The DrPH in Public Health Policy and Management program level competencies on the [program website](#), define professional skills that students are expected to acquire while in the program.

Graduates are expected to competently:

- Using publicly available data, design informative illustrations that support evidence-based decision making.
- Analyze the health, economic, and social impacts of state and federal legislation addressing contemporary public health problems.
- Analyze administrative, management and regulatory issues that impact the deliver of medical care in the US.
- Critique the financial health of public health, health care and non-profit organizations.
- Propose strategies for health improvement and elimination of health inequities by organizing stakeholders, including researchers, practitioners, community leaders and other partners.

DrPH Admissions Criteria:

The program is designed for students who have been awarded a Master's degree, preferably a Master of Public Health, and who have at least two years of public health work experience.

DrPH – Public Health Policy & Management Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 64 credits is required to earn the degree, 46 units of course work and 18 units of dissertation credit. Required course work includes 14 units in the DrPH core; 14 units in the PHPM concentration; 9 units of electives, at least 9 units in a minor area of study, and 18 units of dissertation hours. ***Students entering without a MPH degree are required to complete the five core MEZCOPH MPH courses or their equivalent in addition to the minimum required for the DrPH degree.***

DRPH REQUIRED COURSES - (14 units)

PHPM 569	Fundamentals of Health Budgeting and Financial Management (3)
PHPM 608A	Public Health Law and Ethics (3)
PHPM 609	Evaluating the Public Health Literature (1 unit; 2 times) ¹
HPS 544	Fundamentals of Evaluation (3) or alternate (3) (approved by Faculty Advisor)
HPS 704	Doctoral Public Health Leadership for Health Equity (3)

PUBLIC HEALTH POLICY AND MANAGEMENT REQUIRED COURSES - (14 units)

PHPM 617	Advanced Public Health Policy Analysis (3)
PHP 641	Health Systems Delivery (3)
PHPM 696P	Public Health Policy and Management Field Course (2) Community and Cultural Sensitivity Course (3) ² Higher Level Methods Course (3) ²

ELECTIVES - (minimum 9 units, approved by Faculty Advisor)

MINOR - (minimum 9 units)

The minor area of study can be in other academic doctoral programs in Public Health or in other doctoral programs throughout the University. The minor area of study specifies the number of required minor units with the minimum being 9 units.

DISSERTATION - (minimum 18 units)

The dissertation experience is expected to provide students a mentored opportunity to analyze an important public health problem by applying state-of-the-art theoretical and applied practices. The ultimate goal is to develop an evidence-based, policy-relevant solution to improve the health and well-being of the general public.

Total Required Credit Hours: 64

¹ HPS 609 is a 1 unit course that must be taken twice, preferably during the first year of the program.

² With approval of faculty advisor

PhD Minor in Public Health

The PhD Minor in Public Health is designed for individuals from other University of Arizona doctoral degree programs who wish to obtain graduate training in Public Health. The student identifies at least one faculty member with a primary appointment in MEZCOPH to serve on his or her committee. The student should hold a Planning Committee meeting where the committee faculty can provide advisement to the student regarding coursework.

PhD Minor IN PUBLIC HEALTH TOTAL MINIMUM CREDIT REQUIREMENTS - (15 units)

The Public Health minor consists of a minimum of three Master of Public Health Core courses and two concentration specific courses agreed to by the student and his or her minor advisor. At the time the selections are made, the minor advisor and the student will define how competency will be determined. The demonstration may take several forms consistent with the practices of the home department. The minor member may contribute to the formulation of the comprehensive exam; the minor member may submit a specific written question; the minor may require participation in an active public health experience with a written summary to cite only a few examples. Other approaches are permissible with the consent of the student's Graduate Committee.

In addition to the PhD Minor in Public Health, The University of Arizona Mel and Enid Zuckerman College of Public Health (MEZCOPH) offers a **Master of Public Health (MPH)** degree featuring ten concentration areas. Students can apply to the MPH Program within any of the concentration areas. The MPH can also serve as the students PhD Minor, although the MPH requirements must be completed prior to completion of the PhD. For more information regarding the MPH program in general, please refer to the following website: <http://publichealth.arizona.edu/academics/mph>

PhD Minor in Global Health

The PhD Minor in Global Health in the Mel and Enid Zuckerman College of Public Health is designed for University of Arizona doctoral students who desire to obtain doctoral level training in global public health. This doctoral minor will provide participants with knowledge and skills necessary to engage effectively in global health policy and practice, whether at home in a diverse setting, or abroad where populations and communities are under-resourced, and where health systems are constrained. A total of 12 course units are required, in addition to successful completion of an oral and written comprehensive exam that is individually tailored to the specific global health interests and career goals of each student.

PhD Minor in Global Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

The PhD Minor in Global Health in the Mel and Enid Zuckerman College of Public Health is designed for University of Arizona doctoral students who desire to obtain doctoral level training in global public health. This doctoral minor will provide participants with knowledge and skills necessary to engage effectively in global health policy and practice, whether at home in a diverse setting, or abroad where populations and communities are under-resourced, and where health systems are constrained. A total of 12 course units are required, in addition to successful completion of an oral and written comprehensive exam that is individually tailored to the specific global health interests and career goals of each student.

REQUIRED COURSES – (6 units)

HPS 533	Global Health (3)
EHS 525	Global to Local: Environmental Change and Human Health

ELECTIVES – (select 6 units)

ANTH 605	Qualitative Research Methods and Proposal Writing
CPH 557	Global Maternal Health: Metrics, Cultural Perceptions & Policy Approaches (3)
EPID 555	Introduction to Maternal and Child Health Epidemiology (3)
HPS 560	International Nutrition (3)
CPH/GHI 537	Evidence-based Maternal and Child Health (3)
HPS 534	Infectious Diseases, Global Health and Development (3)
EHS 589	Public Health Preparedness (3)
HPS 529	Project Design and Implementation in Global Health (3)
HPS 559	Management of Public Health Emergencies (3)
EHS/EPID 545	One Health Foundations (3)
CPH/GHI 532	Food in 2050 and beyond: Climate Change and Global Health (3)
GWS 546	Health and the Global Economy (3)
CPH/GHI 581	Food System Preparedness for the Global Emergency Risks (3)
EHS 525	Global to Local: Environmental Change and Human Health (3)
GHI 540	Comparative Health Analysis from a Global Perspective (3)
EPID 606	Changing Health Policy: Cultural Understanding & Epi Analysis (4)
EPID 679	One Health Applications and Practice (3)
HPS 635	Applied Field Methods in Global Health Nutrition (3)
EPID 660	Infectious Disease Epidemiology (3)

Doctor of Philosophy in Biostatistics

Paul Hsu, PhD - Program Director

The PhD in Biostatistics is offered by the Department of Epidemiology and Biostatistics. The doctoral degree program in Biostatistics will have an emphasis on the foundations of statistical reasoning and will require its graduates to complete rigorous training in applied probability and statistical analyses. This program prepares students who have demonstrated excellence in mathematics and the sciences to become research biostatisticians in academia, industry, or government.

The PhD program in Biostatistics is designed for individuals having strong quantitative skills with a background or interest in the biological, medical, or health sciences, and potential to become effective researchers in biostatistics. Applicants for the PhD in Biostatistics must have a prior Bachelor's degree. Applicants with a Master's degree in biostatistics, statistics, applied mathematics and other strongly related fields will be given preference for admission and financial support. To the extent possible, the curriculum of each student will be tailored to his or her background and interests. A competitive applicant to the PhD in Biostatistics will have a strong quantitative background; at least three semesters of college-level calculus through multivariable/vector calculus is required; in addition, one semester of linear algebra is strongly recommended.

The doctoral program requires approximately four to five years for completion. The first two to three years of this time is usually devoted to coursework, the comprehensive doctoral examination, and development of doctoral research. The program is research oriented and centers on a major research project. The overall course of study is developed by the student and the Faculty Advisor and is approved by the student's Graduate Committee and the Biostatistics Program Director. Students will be required to defend their dissertation through a public presentation and oral examination with their committee. The PhD in Biostatistics program level competencies on the [program website](#) define professional skills that students are expected to acquire upon graduating from the program.

Credit Hours:

The curriculum requires a minimum of 47 units of course work in the major, of which 35 units are from required courses and 12 are electives. Students are required to select a minor and complete 9 semester hours or more (depending on requirements of the minor department) in their area of interest, and a minimum of 18 units of dissertation credit.

Students with a prior MS degree in Biostatistics or Statistics are eligible for admission into the Biostatistics PhD program. Students who enter the Biostatistics PhD program after completion of an MPH/MS/MA may use 23 units of Biostatistics related courses towards the Doctorate in Biostatistics (PhD) major requirements. Thus, students with an MPH/MS/MA must complete a minimum of 22 additional units of course work, 2 units of seminar, 9 units or more in a minor subject, and 18 dissertation units. They will be allowed to substitute more advanced courses for any required courses already completed. A maximum of 30 previously earned units, inclusive of the doctoral minor requirements, may be applied to the official doctoral plan of study.

PhD – Biostatistics Curriculum

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED COURSES - (35 units)

MATH 564	Theory of Probability (3)
MATH 566	Theory of Statistics (3)
EPID 573A	Basic Principles of Epidemiology (3)
BIOS 576B	Biostatistics for Research (3)
BIOS 685	Special Topics in Biostatistics (3)
BIOS 687	Theory of Linear Models (3)
BIOS 688	Statistical Consulting (3)
STAT 571B	Design of Experiments (3)
STAT 675	Statistical Computing (3)
PHCL 595B	Scientific Writing, Presentation and Bioethics (2)
BIOS 696S	Biostatistics Seminar (1 unit; 2 times)
BIOS 609	Evaluating Public Health Literature (1)
BIOS 585	Public Health Fundamentals for Researchers (3) *

* (For students who have met the core competencies in BIOS 585 through prior courses, for example, as would be expected in a prior degree, minor or certificate in public health, an elective may be taken in lieu of this course).

ELECTIVE COURSES - (12 units)

Electives may also be chosen from other Biostatistics, Statistics or Mathematics courses with approval of the Biostatistics Faculty.

BIOS 511	Healthcare Data Science (3)
BIOS 576C	Applied Biostatistics Analysis (3)
BIOS 576D	Data Management and the SAS Programming Language (3)
BIOS 647	Analysis of Categorical Data (3)
BIOS 648	Analysis of High Dimensional Data (3)
EPID 677	Genetic Association Studies (3)
BIOS 686	Survival Analysis (3)

NOTE: BIOS 576A, Biostatistics in Public Health (3 units), is considered a prerequisite, which will have been met by most entering students.

MINOR - (minimum 9 units)

Each PhD student must complete a minimum of 9 credit hours of course work in a minor area. The minor area of study specifies the number of required minor units. This should consist of a coherent set of courses in an area (or in related areas) of application of biostatistics; the courses may be from more than one program.

DISSERTATION - (minimum of 18 units) – required

Total Required Credit Hours: 74

PhD Minor – Biostatistics Curriculum

Effective for those following the 2025/2026 academic curriculum guide

The PhD Minor in Biostatistics is administered by the Biostatistics concentration in MEZCOPH. The PhD Minor in Biostatistics is designed for individuals from other University of Arizona doctoral degree programs who wish to obtain graduate training in Biostatistics. A total of 15 course credits are required. Admission to the minor must be approved by the Biostatistics minor faculty representative and the Biostatistics Program Director, no later than enrollment in the second minor course. Selection of courses must be performed in consultation with the Biostatistics minor faculty representative.

PHD MINOR IN BIOSTATISTICS REQUIREMENTS

MINOR COURSES - (*minimum of 9 units*)

BIOS 511	Healthcare Data Science (3)
BIOS 576C	Applied Biostatistics Analysis (3)
BIOS 576D	Data Management and the SAS Programming Language (3)
BIOS 647	Analysis of Categorical Data (3)
BIOS 648	Analysis of High Dimensional Data (3)
EPID 677	Genetic Association Studies (3)
BIOS 680	Biostatistical Methods I: Clinical Trials/ Survival Analysis (3)
BIOS 682	Introduction to Genomic Data Science (3)
BIOS 684	General Linear and Mixed Effects Models (3)
BIOS 687	Theory of Linear Models (3)
BIOS 688	Statistical Consulting (3)
MATH 564	Theory of Probability (3)
MATH 566	Theory of Statistics (3)
STAT 571A	Advanced Statistical Regression Analysis (3)
STAT 571B	Design of Experiments (3)
STAT 675	Statistical Computing (3)

It is the responsibility of the student to have met prerequisites (if not already required for the student's major), such as:

BIOS 576A	Biostatistics in Public Health
BIOS 576B	Biostatistics for Research

Doctor of Philosophy in Environmental Health Sciences

Aminata Kilungo, PhD - Program Director

The PhD in Environmental Health Sciences is offered by the [Department of Community, Environment and Policy](#). Using an interdisciplinary approach, Environmental Health Sciences examines the critical link between environmental and occupational exposures and human health. The degree prepares individuals to research, evaluate, and control health risks posed by chemical and biological contaminants and physical exposures (noise, heat and radiation) in communities and occupational environments.

Students will receive advanced training and experience in the application of epidemiological and community-based research methods, statistical analysis, exposure assessment, environmental modeling, toxicology, and intervention design. Graduates of this program will apply theory and methods to public health research, evaluation, analysis and decision-making.

The Doctorate in Environmental Health Sciences trains students for research careers and leadership roles in academia, government agencies, research institutes, consulting firms and industry. The program is designed for individuals with a variety of scientific backgrounds. Our faculty and students come from diverse backgrounds with advanced training in: medicine, ecology and evolutionary biology, geology, microbiology, engineering, architecture, nutrition, and policy.

Entry into the PhD program requires successful completion of a master's degree in a related field. The PhD program requires approximately three to five years for completion. At least 45 credits are required for the major, plus a minimum of 18 dissertation units, and at least 9 units for a minor in another department. The course of study and dissertation will be developed by the student, the faculty advisor and their committee. The PhD requires at least 72 credits (including a minimum of 18 units of electives; a minimum of 18 dissertation units, and a minimum of 9 units for the minor). The overall course of study will be developed by the student and the faculty advisor and approved by the student's Graduate Committee and the Environmental Health Sciences Program Director. The PhD in Environmental Health Sciences program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduation from the program.

PhD – Environmental Health Sciences Curriculum

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED MAJOR COURSES - (27 units)

EPID 573A	Basic Principles of Epidemiology (3)
BIOS 576A	Biostatistics in Public Health (3)
BIOS 576B	Biostatistics for Research (3)
EHS 584	Fundamentals of Industrial and Environmental Health (3)
EHS 502	Environmental Monitoring and Analysis (3)
EHS 585	Public Health Fundamentals for Researchers (3)*
EHS 653	Applied Exposure Assessment (3)
EHS 609	Evaluating Public Health Literature (1)
EHS 696R	Environmental Health Seminar (1 unit each semester – 5 times)

* (For students who have met the core competencies in EHS 585 through prior courses, for example, as would be expected in a prior degree, minor or certificate in public health, an elective may be taken in lieu of this course).

ELECTIVE COURSES - (minimum of 18 units)

Approved by Faculty Mentor. Students select courses in areas of emphasis: Exposure Science and Risk Assessment; Climate and Health; Environmental Contaminant Modeling; and Occupational Health and Safety.

MINOR COURSES - (minimum of 9 units)

Environmental Health Sciences students must complete a minor of at least 9 units from another area of study. Requirements for a PhD Minor in individual departments may vary. Minors that may interest students in this program include: Biostatistics, Epidemiology, Water Quality, Global Climate Change, Environmental Planning, Applied Mathematics, Engineering, Atmospheric Sciences, and Soil, Water and Environmental Science, just to name a few. With committee approval, a minor may be selected from any program of study at the University of Arizona that offers a doctoral degree.

DISSERTATION - (minimum of 18 units) – required

Total Required Credit Hours: 72

PhD Minor – Environmental Health Sciences Curriculum

Effective for those following the 2025/2026 academic curriculum guide

The PhD Minor in Environmental Health Sciences is for majors outside Environmental Health Sciences and is administered by the Environmental Health Sciences (EHS) concentraton in MEZCOPH. **A total of 15 course units** are required as well as successful completion of written and oral questions during the PhD comprehensive exam and successful defense of the dissertation. Consult the UA catalog for further details on the current course schedule and specific course requirements.

PHD MINOR IN ENVIRONMENTAL HEALTH SCIENCES REQUIREMENTS

MINIMUM CREDIT REQUIREMENTS - *(at least 15 units)*

- EHS 502 Environmental Monitoring Methods (3)
- EHS 518 Introduction to Human Health Risk Assessment (3)
- EHS 584 Fundamentals of Industrial and Environmental Health (3)
- 2 additional courses (3 units each) approved by the EHS Minor Faculty Advisor (6)

A list of EHS courses can be found obtained from the EHS Program Director and are listed in the UA catalog under the Environmental Health Sciences.

TRANSFER OF CREDITS FOR THE PHD MINOR

Graduate credit earned at other approved institutions may be counted toward fulfilling the PhD Minor requirements, if approved by the minor faculty mentor, the section chair of the Environmental Health Sciences Section and the student's Graduate Committee. All transferred credit must be at the graduate level with a grade of A or B. The Doctoral Plan of Study requires a listing of all courses the student seeks to transfer from another institution. See the Graduate College website for further details.

DECLARATION OF MINOR

Meet with the Environmental Health Sciences Program Director to discuss the minor. Complete the MEZCOPH Declaration of Doctoral Minor Form; identify an Environmental Health Sciences Minor Faculty Advisor; and seek EHS Faculty Approval through the Environmental Sciences Program Director. The Declaration of Minor form must be filed with the MEZCOPH Graduate Program Coordinator, in the MEZCOPH Office of Student Services (Drachman Hall, Room A302).

Doctor of Philosophy in Epidemiology

Heidi Brown, PhD, MPH - Program Director

The PhD in Epidemiology is offered by the [Department of Epidemiology and Biostatistics](#). Epidemiology is the scientific discipline concerned with the causes and prevention of human disease. Epidemiology focuses on the occurrence of disease among human populations, considering changes within populations over time and differences among and between populations in disease risk. Epidemiologists today are involved in attempts to understand the causes and means of controlling COVID-19 and other infectious diseases, as well as chronic diseases including cancer and metabolic disorders. Much of our understanding of the links between environment and health outcomes, of infectious causes of cancer, of obesity and mortality risk and reproductive health is derived from epidemiologic studies.

The PhD in Epidemiology trains individuals for careers in research and teaching in academic settings, research institutes, government agencies and industry. It has been designed for students whose careers will focus on conducting investigator-initiated and collaborative epidemiologic research. On average, the doctoral program requires four to five years for completion. The first two years are usually devoted to coursework, the qualifying exam, the comprehensive doctoral examinations, and development of doctoral research. The program is research oriented and centers on a major research project.

PhD Course Requirements

At least 46 units are required for the major (including up to 10 units of independent study), plus a minimum of 18 dissertation units, and at least 9 units for the minor (depending on minor department requirements). Consult the course listings for further details on specific course requirements and schedules. The overall course of study will be developed by the student and the advisor and approved by the student's Graduate Committee and the Epidemiology Program Director. Students will be required to defend their dissertation through a public presentation and oral examination with their committee. Please refer to the Epidemiology Student Handbook for additional information. The PhD in Epidemiology program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program.

PhD – Epidemiology Curriculum

Effective for those following the 2025/2026 academic curriculum guide

REQUIRED MAJOR COURSES - (32 units)

EPID 573A	Basic Principles of Epidemiology (3)
EPID 573B	Epidemiologic Methods (3)
EPID 573C	Advanced Epidemiology (3)
BIOS 576A	Biostatistics in Public Health (3)
BIOS 576B	Biostatistics for Research (3)
EPID 585	Public Health Fundamentals for Researchers (3) *
PHCL 595B	Scientific Writing, Presentation and Bioethics (2)
EPID 609	Evaluating the Public Health Literature (1 unit, fall semester of first year)
EPID 660	Infectious Disease Epidemiology (3)
EPID 670	Chronic Disease Epidemiology (3)
EPID 696A	Epidemiology Seminar (1 unit – 3 times) (or equivalent approved by Faculty Advisor)
EPID 796A	Epidemiology Doctoral Seminar (1 unit – 2 times)

* (For students who have met the core competencies in EPID 585 through prior courses, for example, as would be expected in a prior degree, minor or certificate in public health, an elective may be taken in lieu of this course).

ELECTIVE COURSES

14 or more units required; 9 of which must be in Epidemiology/Biostatistics, with at least (3) BIOS units in a course beyond BIOS 576B. A maximum of 10 units of Independent Study/Research Credit (EPID 599, 699, 799, 900) may be used.

MINOR COURSES

According to Graduate College Policy, PhD students must choose at least one supporting minor subject, in addition to the major subject. The selection of a minor subject area is the responsibility of the student, in consultation with their faculty advisor and/or Graduate Committee Chair. The minor area of study specifies the number of required minor units and examinations (**minimum required= 9 units**).

DISSERTATION – EPID 920: minimum of 18 units required

Total Required Credit Hours: 73

PhD Minor – Epidemiology Curriculum

Effective for those following the 2025/2026 academic curriculum guide

The PhD Minor in Epidemiology is designed for individuals from other University of Arizona doctoral degree programs who wish to obtain graduate training in Epidemiology. A member of the primary Epidemiology faculty will serve as the Minor Advisor and sit on the student's Graduate Committee.

The PhD Minor in Epidemiology is administered by the Epidemiology Program. A total of 15 course units are required (see the course listings for further details on the specific course requirements and schedule).

REQUIRED PHD MINOR IN EPIDEMIOLOGY COURSES - (at least 15 units)

EPID 573B Epidemiologic Methods (3)*

EPID 573C Advanced Epidemiology (3)

BIOS 576A Biostatistics for Public Health (3)

BIOS 576B Biostatistics for Research (3)

EPID Elective The elective must be 600-level or above (to be approved by Epidemiology Minor Advisor) (3)

Note on required PhD Minor in Epidemiology coursework:

*MINOR COURSE PREREQUISITES

It is the responsibility of the student to have met course prerequisites (if not already required for the student's major): *EPID 573A, Basic Principles of Epidemiology

MINOR GPA REQUIREMENT - 3.5/4.0 scale in the required PhD Minor in Epidemiology courses.

Doctor of Philosophy in Health Behavior Health Promotion

Nicole Yuan, PhD, MPH - Program Director

The PhD in Health Behavior Health Promotion (HBHP) is offered by the [Department of Health Promotion Sciences](#). The doctoral degree program in Health Behavior Health Promotion will have an emphasis on the biological, behavioral, and sociocultural determinants of health and health behavior, and the interventions and policies aimed at improving community and population health. The PhD program includes instruction in behavioral sciences, public health practice and policy, human services, and research methods. The doctoral program will offer a diverse and challenging curriculum that addresses health behavior health promotion theory; knowledge and skills for working on health issues among communities in the Southwest and other regions of the United States and around the globe; mixed qualitative and quantitative research methods; statistics, and grant development skills.

Students will further specialize in one or more areas by methodology (applicable quantitative and qualitative methods) and/or topic--examples include promoting population health equity in one or more underserved communities or developing/testing theory-based healthy lifestyle promotion interventions.

The requirement for entry into the PhD will be a bachelor's degree. Outstanding course performance and strong evidence for research interest and aptitude in health behavior health promotion is required for all admitted students. Applicants without a prior related master's degree will complete a Master of Science in Public Health (MSPH) in route to their PhD in Health Behavior Health Promotion. For students admitted to the PhD program without a prior related master's degree, the MSPH develops the student's ability to think critically, develop and execute research, while also providing depth in health behavior health promotion, epidemiology and biostatistics. These skills are essential to the success of a future PhD student and future health promotion health behavior scholar. Students are expected to complete the MSPH as a required component of this program when entering without a prior master's degree. A total of 30 units of MSPH coursework may apply toward the PhD provided the student received A or B grades in those units.

The MSPH is not a stand-alone degree. Students interested in graduate studies in health behavior health promotion, who are uncertain of a research career focus, are encouraged to discuss applying for the Master of Public Health (MPH) with department faculty and MEZCOPH's Office of Student Affairs. The MPH with a concentration in HBHP affords sound preparation for the PhD program, while foremost being designed as a functional terminal degree for immediate workforce entry.

The doctoral program requires approximately four to five years for completion. The first two years of this time are usually devoted to coursework, the comprehensive doctoral examinations, and development of doctoral research. The program is research oriented and centers on a major research project. The overall course of study is developed by the student and the Faculty Advisor and is approved by the student's Graduate Committee and the Health Behavior Health Promotion Program Director. Students will be required to defend their dissertation through a public presentation and oral examination with their committee. The MSPH/PhD in Health Behavior Health Promotion program level competencies on the [program website](#), define professional skills that students are expected to acquire upon graduating from the program.

PhD – Health Behavior Health Promotion Curriculum

Effective for those following the 2025/2026 academic curriculum guide

For students entering with a master's degree, the PhD curriculum will require a minimum of 63 credit hours (units). Of these, 18 units are required from major courses; 3 units are required on US minority/health disparities; 3 units on health promotion research content electives; 12 units of other electives; 9 units (minimum) for the minor; and 18 units for the dissertation. A maximum of 30 units from a prior degree may be applied towards an admitted student, pending review by the student's advisory committee. The **63 unit** curriculum is detailed below.

REQUIRED MAJOR COURSES - (18 units)

BIOS 576B	Biostatistics for Research (3) ¹
HPS 585	Public Health Fundamentals for Researchers (3) ²
HPS 607	Qualitative Research Methods in Public Health (3)
HPS 609	Evaluating the Public Health Literature (1)
HPS 620A	Advanced Research Methods in Health Promotion I (3) ³
HPS 618	Introduction to Systematic Review (3)
HPS 696L	Health Behavior Health Promotion Seminar (1 unit; 2 times) ³

REQUIRES U.S. MINORITY/HEALTH DISPARITIES COURSE - (minimum 3 units)

HPS 535	Multicultural Health Beliefs (3)
	<u>or</u> HPS 605 Community Based Participatory Action Research to Decrease Health Disparities (3)

¹ BIOS 576A or other introductory graduate statistics course is a prerequisite for BIOS 576B. Another graduate statistics course beyond an introductory graduate statistics course and with a minimum coverage of multiple linear/GLM or logistic regression may be considered with approval of the student's Faculty Advisor and the Program Director.

² For students who have met the core competencies in HPS 585 through prior courses, for example, as would be expected in a prior degree, minor or certificate in public health, an elective may be taken in lieu of this course.

³ Permanent courses addressing this content as assessed by the Program Director are acceptable substitutions.

REQUIRED HEALTH PROMOTION EMPHASIS ELECTIVES - (minimum of 3 units)¹

HPS 531	Contemporary Health Issues & Research (3)
HPS 532A	Applied Aspects of Program Planning, Implementation & Evaluation I (4)
HPS 535	Multicultural Health Beliefs (3) ²
HPS 577	Sociocultural & Behavioral Aspects of Public Health (3)
HPS 605	Community Based Participatory Action Research to Decrease Health Disparities (3) ²
HPS 622	Applied Research Methods in Diet and Physical Activity (3)
HPS 642	Public Health Communications (3)
EPID 671	Social Epidemiology (3)
EPID 646	Measurement Issues in Epidemiology (3)
EPID 673	Mixed Research Methods- Design, Conduct and Application in Health Research (3)

OTHER ELECTIVES - (minimum 12 units, approved by Faculty Advisor/Doctoral Committee) These electives will often be independent studies with a research focus, public health graduate courses, or other graduate theory, content or methodology-related courses at the University, relevant to the doctoral area of study).

MINOR - (minimum 9 units)

Each PhD student must complete a minimum of 9 credit hours of course work in a minor area. The minor area of study specifies the number of required minor units. This should consist of a coherent set of courses in an area (or in related areas) of health behavior health promotion, in consultation with the PhD student's faculty advisor and/or Graduate Committee Chair. These courses may be from more than one program.

DISSERTATION – HPS 920 - minimum of 18 units required

Total Required Credit Hours: 63

¹ Another health promotion related graduate course may be substituted with approval of the student's Faculty Advisor

² (if not already used to fulfill the US minority health/disparities requirement)

MSPH/PhD – Health Behavior Health Promotion Curriculum

Effective for those following the 2025/2026 academic curriculum guide

For students entering without a master's degree, the PhD curriculum will require a minimum of 73 credit hours (units), with 40 units required toward completing the Master of Science in Public Health (MSPH). The MSPH component requires 25 required major course credits; 3 units are required on US minority/health disparities; 6 units of other electives; and 6 units of thesis. Additional required units post completion of the MSPH include 2 additional major units, 4 additional selective units, 9 units (minimum) for the minor, and 18 units for the dissertation, allowing for a maximum of 30 units to be shared between the MSPH and PhD. Additionally, a maximum of 8 units from prior graduate coursework (6 units from a prior awarded degree) may be considered (pending review) to be applied towards the MSPH component.

Requirements for MSPH to PhD in Health Behavior Health Promotion for students entering without a prior master's degree:

MASTER OF SCIENCE IN PUBLIC HEALTH (MSPH) REQUIREMENTS - (40 units)

REQUIRED MAJOR COURSES - (25 units)

HPS 531	Contemporary Health Issues & Research (3)
HPS 585	Public Health Fundamentals for Researchers (3) 1
BIOS 576A	Biostatistics in Public Health (3)
BIOS 576B	Biostatistics for Research (3) 2
HPS 607	Qualitative Research Methods in Public Health (3)
HPS 620A	Advanced Research Methods in Health Promotion I (3) 3
HPS 618	Introduction to Systematic Reviews (3)w
HPS 696L	Health Behavior Health Promotion Seminar (1)

HPS Selective Course (minimum of 3 units) – may be met with any HPS offered 3+ unit, 500+ level course (e.g. HPS 532A; 535; 577; 605; 619; 622; 642) or another health promotion related course (e.g. EPID 573A; EPID 646; EPID 671; COMM 669) approved by Faculty Advisor

REQUIRED U.S. MINORITY/HEALTH DISPARITIES COURSE - (minimum 3 units)

HPS 535	Multicultural Health Beliefs (3) 4
	or HPS 605 Community Based Participatory Action Research to Decrease Health Disparities (3) 4

OTHER ELECTIVES - (minimum 6 units, approved by Faculty Advisor)

REQUIRED MASTER'S THESIS - HPS 910 - minimum of 6 units

ADDITIONAL CORE REQUIREMENTS FOR THE PHD POST COMPLETION OF THE MSPH - (33 units)

REQUIRED COURSES - (6 units)

HPS 609 Evaluating the Public Health Literature (1)

HPS 696L HBHP Seminar (1) 3

HPS Selective Course (minimum of 4 units)

APPROVED MINOR - (minimum of 9 units required)

Each PhD student must complete a minimum of 9 credit hours of course work in a minor area. The minor area of study specifies the number of required minor units. This should consist of a coherent set of courses in an area (or in related areas) of health behavior health promotion, in consultation with the student's faculty advisor and/or Graduate Committee Chair. These courses may be from more than one program.

DISSERTATION – HPS 920 – minimum of 18 units required

NOTES

1 (For students who have met the core competencies in HPS 585 through prior courses, for example, as would be expected in a prior degree, minor or certificate in public health, an elective may be taken in lieu of this course).

2 Note: BIOS 576A or other introductory graduate statistics course is a prerequisite for BIO 576B. Another graduate statistics course beyond an introductory graduate statistic course and with a minimum coverage of multiple linear/GLM or logistic regression may be considered with approval of the student's Faculty Advisor and the Program Director.

3 Permanent courses addressing this content as assessed by the Program Director are acceptable substitutions.

4 (if not already used to fulfill the US minority health/disparities requirement)

Total Required Credit Hours: 73

PhD Minor – Health Behavior Health Promotion Curriculum

Effective for those following the 2025/2026 academic curriculum guide

The PhD Minor in Health Behavior Health Promotion (HBHP) is designed for individuals from other University of Arizona doctoral degree programs who wish to obtain graduate training in Health Behavior Health Promotion and is administered by the Department of Health Promotion Sciences in the Zuckerman College of Public Health. A total of 12 course units are required, as well as successful completion of written and oral questions during the PhD Comprehensive exam, and successful defense of the dissertation. Consult the UA catalog and UA schedule of classes for further details and specific course requirements.

REQUIRED COURSES - *(at least 12 units):*

Take the following course:

HPS 577 Sociocultural & Behavioral Aspects of Public Health (3)

Choose one course on U.S. Minority Health/Health Disparities - *(minimum 3 units) **

HPS 535 Multicultural Health Beliefs (3)

or HPS 605 Community Based Participatory Action Research to Decrease Health Disparities (3)

* or alternate course with a core focus on a US minority health issue or health disparities with minor faculty advisor approval

Choose two courses on Health Promotion Science related content - *(minimum 6 units)*

All HPS led graduate courses are acceptable. Other public health/health promotion related courses within or outside the College require minor faculty advisor's approval.

Graduate Certificate Programs

The University of Arizona Mel and Enid Zuckerman College of Public Health is committed to serving the public health educational needs of working professionals in the State of Arizona and beyond. In addition to offering curriculum at the undergraduate and graduate levels, we offer seven graduate certificate programs. Designed for working professionals and/or those exploring the field of public health, the certificate programs provide skill enhancement for both domestic and international participants who have limited time to pursue a campus-based full graduate degree program. With the exception of the Clinical & Translational Research Graduate Certificate which is only offered through the Main Campus, all certificate programs are available to students in the Main and Online Campuses.

- [The Clinical & Translational Research Graduate Certificate](#) prepares interprofessional scientists for the complexities of clinical and translational research through high-quality didactic instruction and mentored collaborative research experiences.
- [The Graduate Certificate in Global Health & Development](#) provides participants the foundation knowledge and skills necessary to function effectively in global health practice, whether at home in a diverse setting, along the border in a bi-cultural environment, or abroad where populations are under-resourced and where health systems are constrained.
- The [Graduate Certificate in Health Administration](#) offers Tucson or Phoenix-based as well as online working health professionals and graduate students an opportunity to advance their health administration training. Upon completion of the certificate program, students will have knowledge and skills in the following areas: strategic planning, budgeting and finance, health care economics and policy, and advanced health care services administration.
- The [Graduate Certificate in Indigenous Health](#) is designed to enhance the education of graduate students, health and allied professionals in indigenous public health issues, models and frameworks. Students will gain competence in administrative and policy dimensions of indigenous health, as well as analyzing research, ethics challenges, and evaluation methods.

- The [Graduate Certificate in One Health](#) consists of 4 courses (12 units) designed to meet the needs of students and professionals. Coursework focuses on a broader view of the multidisciplinary approaches needed to holistically address the interconnectedness of animals, humans, and the environment and related health impacts.
- The [Graduate Certificate in Public Health](#) offers working professionals a flexible and convenient option for advancing their public health training. The certificate is affiliated with the Master of Public Health (MPH) degree and consists of the five core courses that are required of all MPH graduates.
- The [Graduate Certificate in Public Health Emergency and Pandemic Preparedness](#) provides participants with skills needed to support public health response to emergencies, epidemics and pandemics. Participants will gain proficiency in the National Incident Management System and attain Centers for Disease Control & Prevention (CDC) Emergency Responder Tier Two level credentials using epidemiological tools to conduct rapid assessment and public health investigation of emergencies/disease outbreaks.

Clinical & Translational Research Graduate Certificate Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 13 units are required for the Clinical & Translational Research graduate certificate. Admission to the certificate requires concurrent enrollment or completion of a master's degree with a 3.0 cumulative GPA.

The University of Arizona's Clinical & Translational Research (ACTR) graduate certificate program prepares interprofessional scientists for the complexities of clinical & translational research through high-quality didactic instruction, and mentored collaborative research experiences.

Clinical and translational research is fundamental for prevention, treatment, diagnosis and relief of symptoms of disease in human populations. Worldwide, there is an increasing need for highly qualified clinical researchers. The ACTR graduate certificate program has a strong track record for training interprofessional translational clinical researchers.

REQUIRED - (7 units)

EPID 573A	Basic Principles of Epidemiology (3)
BIOS 576A	Biostatistics for Public Health (3)
EPID 696T	Clinical & Translational Research Seminar (1)

REQUIRED SELECTIVES - (3-6 units)

Choose a minimum of 3 units; maximum of 6 units may apply to certificate requirements.

BIOS 576B	Biostatistics for Research (3)
BIOS 576D	Data Management & SAS Programming (3)

ELECTIVES - (0-3 units) *

Choose 0 – 3 units to reach minimum certificate requirement of 13 units total.

BIOS 550	Health Data Acquisition (3)
BIOS 551	Health Data Management and Visualization (3)
EPID 573B	Epidemiologic Methods (3)
EPID 573C	Advanced Epidemiology (3)
HPS 620A	Advanced Research Methods in Health Promotion Sciences (3)
BIOS 680	Biostatistical Methods I: Clinical Trials/Survival Analysis (3)
EPID 696A	Epidemiology Seminar (1)
BIOS 696S	Biostatistics Seminar (1)

* Other possible elective courses can be found on the MEZCOPH [website](#). Elective courses not on the above list must first be approved by the Director of Graduate Studies of the ACTR Certificate program.

Graduate Certificate in Global Health & Development Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A total of 12 units is required, with 9 units of required coursework and 3 units of elective coursework.

Admission to the certificate requires completion of an undergraduate degree with a 2.75 GPA (based on the last 60 units).

The Mel and Enid Zuckerman College of Public Health houses the Global Health Institute (GHI), one of the many centers of excellence in education, research, and service of the University of Arizona's Health Sciences Center. GHI is dedicated to finding evidence-based solutions to global health problems through the education and training of tomorrow's global health leaders. It is a unique partnership that promotes collaboration between the University of Arizona, partner universities, organizations, and individuals around the world.

The Graduate Certificate in Global Health & Development is one of the flagship education programs of the GHI. Designed for professionals and those entering the field of global health, this online program is a flexible option for those who wish to balance coursework and career, while maintaining an environment of utmost academic rigor. The course meets the need for skill enhancement for both foreign and domestic individuals who have limited time to pursue a campus-based full degree program.

REQUIRED - (9 units)

HPS 533	Global Health (3)
HPS 529	Project Design & Implementation in Global Health (3)
HPS 559	Management of Global Public Health Emergencies (3)

ELECTIVE - (3 units)

EHS 539A	Outbreaks & Environmental Microbiology: Then & Now (3)
EHS 545	One Health Foundations (3)
EHS 546	One Health Approach & Case Studies (3)
EPID 572C	Analysis of Public Health Data (3)
CPH/GHI 537	Evidence-based Maternal & Child Health (3)
HPS 628	Public Health Research & Evaluation (3)
PHP 521	Administrative Dimensions of Indigenous Health (3)
PHPM 528	Indigenous Research & Ethics (3)
HPS 534	Infectious Diseases, Global Health and Development (3)
CPH 537	Evidence-based Methods Maternal and Child Health (3)
HPS 599	Independent Study in Global Health & Development Issues (1-6)

Graduate Certificate in Health Administration Curriculum

Effective for those following the 2025/2026 academic curriculum guide

***A minimum of 15 units are required for the graduate certificate in Health Administration.
Admission to the certificate requires completion of an undergraduate degree with a 3.0 GPA
(based on the last 60 units).***

The Graduate Certificate in Health Administration offers Tucson or Phoenix-based as well as online working health professionals and graduate students an opportunity to advance their health administration training. Upon completion of the certificate program, students will have knowledge and skills in the following areas: strategic planning, budgeting and finance, health care economics and policy, and advanced health care services administration.

REQUIRED - (15 units)

- | | |
|----------|---|
| PHPM 507 | Health Care Economics and Policy (3) |
| PHPM 558 | Health Care Marketing (3) |
| PHPM 561 | Introduction to Health Care Quality and Safety (3) |
| PHPM 562 | Health Services Administration (3)
<u>or</u> PHP 641 Health Systems Delivery (3) * |
| PHPM 569 | Fundamentals of Health Budgeting and Financial Management (3) |

Graduate Certificate in Indigenous Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 13 units are required for the graduate certificate in Indigenous Health.

***Admission to the certificate requires completion of an undergraduate degree with a 3.0 GPA
(based on the last 60 units).***

The Graduate Certificate in Indigenous Health is offered fully online for the working professional who would like to build skills and competencies that are necessary to engage in evidence-based public health practice at the leadership, management, and supervisory levels. Populations in indigenous communities have disproportionately worse health outcomes than national averages. To meet the health disparity challenges in these underserved and often health professionals-shortage areas, the program focuses on courses designed to equip participants with skills in analysis of critical indigenous public health issues, models, and frameworks. Students can complete the certificate in one academic year.

REQUIRED - (13 units)

PHPM 517	Indigenous Public Health (3)
PHP 521	Administrative Dimensions of Indigenous Health (3)
PHPM 568	American Indian Health Care Policy (3)
HPS 556	Indigenous Methods and Evaluation Approaches (3)
HPS 597B	Maternal and Child Health Programs in the Rural Southwest (1)

Graduate Certificate in Maternal and Child Health Epidemiology Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 12 units are required for the graduate certificate in MCH Epidemiology.

Admission to the certificate requires completion of an undergraduate degree with a 2.75 GPA (based on the last 60 units).

The Graduate Certificate in Maternal and Child Health Epidemiology is offered fully online for the working professional who would like to develop a strong understanding of epidemiologic issues affecting reproduction, childhood and women's health. Students will build skills and competencies in utilizing epidemiology tools for managerial decision-making, developing and evaluating successful health intervention programs, and engaging families and communities to improve health outcomes. Students can complete the certificate in one academic year.

REQUIRED - (9 units)

EPID 555	Introduction to Maternal and Child Health Epidemiology
EPID 573A	Basic Principles of Epidemiology (3)
BIOS 576A	Biostatistics in Public Health (3)

ELECTIVE - (3 units)

CPH 536	Project Design, Implementation and Evaluation in MCH (3)
CPH 537	Evidence-based Methods in MCH (3)
CPH 554	MCH Information and Data Systems for Public Health (3)
CPH 557	Global Maternal Health: Cultural Perceptions and Policy Approaches (3)
500-level course as approved by Program Director (3)	

Graduate Certificate in One Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 12 units are required for the graduate certificate in One Health.

Admission to the certificate requires completion of an undergraduate degree with a 2.75 GPA cumulative or in last 60 units.

One Health is an academic discipline that has been recognized worldwide as a way to understand and address global challenges related to health. The One Health paradigm recognizes connections among the health of animals, the environment, and humans. New strategies are needed to cope with changing ecosystems that lead to altered patterns of disease transmission. Zoonotic infections (i.e., those spread between animals and people) are common in the U.S. and globally, such as the COVID-19 outbreak.

The Graduate Certificate in One Health is intended to 1) enhance the education of graduate students and professional students beyond their regular course of study; and 2) provide additional training to professions already in the field including researchers, Public Health practitioners, those in the medical field and others.

REQUIRED - (9 units)

- EHS/EPID 545 One Health Foundations (3) (Fall)
- EHS 546 One Health Approach and Case Studies (3) (Fall)
- EPID 579 Applied Infectious Disease Epidemiology (3) (Spring)

ELECTIVE - (3 units)

Select from:

- EHS 520 Environmentally Acquired Illnesses (3)
- EHS 5xx Life Course Epidemiology of Environmental Exposures (3)
- EHS 525 A Public Health Lens to Climate Change (3)
- EHS 526 Topics in Environmental Justice (3)
- EHS 528 Indigenous Research and Ethics (3)
- HPS 533 Global Health (3)
- EHS 539A Outbreaks and Environmental Microbiology; Then to Now (3)
- EHS 546 One Health Approach and Case Studies (3)
- EHS 551 One Health Systems Thinking (3)
- EHS 553 Toxicology and Chemical Exposures (3)
- HPS 559 Management of Global Public Health Emergencies (3)
- HPS 577 Social and Behavioral Aspects of Public Health (3)
- EPID 679 One Health Applications and Practice (3)

Graduate Certificate in Public Health Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 15 units are required for the graduate certificate in Public Health.

Admission to the certificate requires completion of an undergraduate degree with a 3.0 GPA cumulative or in last 60 units.

The Graduate Certificate in Public Health is a distance-learning program at MEZCOPH that offers working professionals a flexible and convenient option for advancing their public health training. The certificate is affiliated with the MPH degree and consists of the five core courses that are required of all MPH graduates.

This certificate may be completed fully online or fully in-person. Main Campus students have the option to choose between the two modes of delivery. It is a variable schedule program that can be completed in one to four years. Upon completion of the certificate, students who are admitted to the MPH program may apply all fifteen credits to their degree.

REQUIRED - (15 units)

EPID 573A	Basic Principles of Epidemiology (3)
PHPM 574	Public Health Policy & Management (3)
EHS 575	Environmental & Occupational Health (3)
BIOS 576A	Biostatistics for Public Health (3)
HPS 577	Sociocultural & Behavioral Aspects of Public Health (3)

Graduate Certificate in Public Health Emergency & Epidemic Preparedness Curriculum

Effective for those following the 2025/2026 academic curriculum guide

A minimum of 12 units are required for the graduate certificate in Public Health

Emergency and Epidemic Preparedness. Admission to the certificate requires completion of an undergraduate degree with a 2.75 GPA (based on the last 60 units).

The Graduate Certificate in Public Health Emergency and Epidemic Preparedness will provide participants with skills needed to support public health response to emergencies, epidemics, and pandemics. Upon completion of the certificate, students will have proficiency in the National Incident Management System, attain Centers for Disease Control & Prevention (CDC) Emergency Responder Tier Two level credentials (i.e., Certification in FEMA courses ICS 100, 200, 700, and 800), use epidemiological tools to conduct rapid assessment and public health investigation of emergencies/disease outbreaks, conduct contact-tracing, and demonstrate skills needed to support emergency response at local, state, national, or global levels. Individuals who successfully complete this certificate will also earn three FEMA certificates and a certificate in contact tracing. Delivered fully online through Arizona Online and on main campus, this certificate program can be completed in one year.

REQUIRED - (9 units)

EHS 559	Management of Public Health Emergencies (3)
EHS 589	Public Health Preparedness (3)
EHS 590	Pandemic Emergency Response Capstone (3)

ELECTIVE – (3 units)

HPS 534	Infectious Diseases, Global Health and Development (3)
EHS 539A	Outbreaks and Environmental Microbiology: Then to Now (3)
EHS 520	Environmentally Acquired Illnesses (3)
EHS 502	Environmental Monitoring Methods (3)
EHS/EPID 545	One Health Foundations (3)
EPID/BIOS/	Independent Study (1-6)
EHS/HPS 599
